* Deceased.

Denver, Colo., December 12, 1928.

To the Governor and Members of the Legislature:

I hereby submit for your consideration, in accordance with the requirements of the law, a statement of the educational system of the State of Colorado, also, the recommendation for the advancement and improvement of the educational work as determined by observation, practical experience and present-day needs.

Colorado's public school system compares favorably with the best state public school systems in the country. It is being enlarged and expanded rather rapidly to meet the needs of a growing population, there being few states where the percentage of increase in school buildings and in teachers employed has been greater in the past decade. In recent years the number of schools has been decreasing rather than increasing, however, due to the establishment of large numbers of consolidated schools, which provide much better educational facilities than the smaller schools they replace could ever have provided.

The State has a large permanent school fund, derived from the sale of land given the State by the federal government for the benefit of the public schools and known as State school land.

By far the largest part of the revenue of the public schools is derived from direct taxation. Special county tax levies are made for school purposes.

There are many changes necessary to meet present-day needs; that of revision in the laws directing the control and maintenance of the public school system. The laws are inadequate and we recommend the repeal of some of the school laws of Colorado, and that some acts be amended to clarify the meaning of the wording, which in many instances is ambiguous; change of wording in regard to the names of boards, committees, etc., also acts relating to powers of boards, transportation, etc., which are incomplete according to requirements.

The school law is a subject which should be of the greatest possible concern to the Governor, every member of the Legislature, and the Attorney General's office, as well as to the Department of the State Superintendent of Public Instruction.

Respectfully,

KATHERINE L. CRAIG,
State Superintendent of Public Instruction.

**OFFICIAL VISITS AND MEETINGS ATTENDED BY THE
STATE SUPERINTENDENT OF PUBLIC INSTRUCTION****1927**

Jan. 17—Attended banquet and reception of W. C. T. U., Albany Hotel.

Jan. 19—Attended meeting of Parent-Teacher Association, Wyman School, and made address.

APPEALS—1927

Ida Hull Kenton,

vs.

School District No. 25 of Moffat County.

Appeal from the action of the County Superintendent regarding the incompetency of Ida Hull Kenton and her dismissal as teacher in School District No. 25, Craig, Colorado.

Appeal dismissed July 22, 1927.

School District No. 55, in the County of Washington, State of Colorado: the Board of Directors of School District No. 55, in the County of Washington, State of Colorado; C. F. Burk, President; Arthur M. Donald, Treasurer, and Mrs. Cora A. Maggard, Secretary.

vs.

Proposed School District No. 88 in the County of Washington, State of Colorado, and the Board of Directors of proposed School District No. 88, in the County of Washington, State of Colorado, Jessie Deweese, President; Edith Deweese, Secretary; Rufus Perry, Treasurer.

Appeal of School District No. 55, Washington County, Colorado, from an order or decision of Miss Mary M. Young, County Superintendent of Schools of Washington County, Colorado, authorizing the organization of a new school district (No. 88) out of a portion of an old district (No. 55).

Order or decision of the County Superintendent affirmed and appeal dismissed October 25, 1927.

**Rules Governing the State Reading Circle Board of the
State of Colorado**

1. The State Reading Circle, having originated in the office of the State Superintendent of Public Instruction in 1905, shall continue to function from and in connection with this department.

2. The law provides (Sec. 218, 1923, School Laws) that an examination is to be given in the state reading circle course in order to obtain a county certificate.

3. The board shall consist of five members, the State Superintendent of Public Instruction, president ex-officio, and four others, one of whom shall be a county superintendent.

4. These four members shall be appointed by the State Superintendent of Public Instruction and serve during her administration.

5. The appointments on the board will be based upon personal qualifications, on scholarship, ability, judgment and literary attainments.

6. Service by the board shall be rendered without compensation.

7. The State Reading Circle Board shall meet subject to the call of the State Superintendent of Public Instruction.

8. It shall be the duty of the State Superintendent of Public Instruction to include a report of the work of the State Reading Circle Board in the biennial report of the state department to the Governor of the State of Colorado.

9. The Reading questions given in the county examination for teachers will be based upon the Reading Circle books.

10. The Reading questions given in the eighth grade examination will be based upon the Reading Circle books.

11. Applicants for state certificates are requested to read the State Reading Circle books.

12. State Reading Circle books are required as library books in the standardization of schools.

13. State Reading Circle work will be included in the course approved by the Superintendent of Public Instruction for renewals of certificates.

14. The State Teachers College at Greeley, Colorado, will grant credit on a correspondence course in Current Educational Literature outlined by the College and based upon the State Reading Circle books.

Rules Governing the Selection of Books

1. There shall be a meeting of the State Reading Circle Board on the first Saturday in April of each year for the selection of the Reading Circle books.

2. The State Superintendent of Public Instruction as chairman of this board shall notify book companies of the time set for such selection, and shall enclose a copy of these rules.

3. There shall be selected not more than four books. Professional, sociological, historical and literary productions, and high grade, up-to-date fiction shall be the types of books considered.

4. The choice of any one book shall be declared adopted, provided that it meets with a majority vote of the board.

5. The same method of procedure shall control the selection of the pupils' Reading Circle books.

6. Each book will be selected upon merit, and best adaptation to its specific purpose.

REPORT OF THE ASSISTANT STATE LIBRARIAN

1927-1928

To the Honorable Katherine L. Craig.

State Superintendent of Public Instruction.

Denver, Colorado.

Dear Miss Craig:

I have the honor to submit to you, for your consideration and approval, the biennial report for the years 1927 and 1928.

Statement

The largest portion of the State Library consists of United States government documents and reports and those of the forty-eight states of these United States, all of which, coupled with the large historical, biographical and general reference department,

enable research workers of our own state and other states and libraries to secure valuable information. The law governing the library service limits the circulation of books to state officials and their deputies, and to responsible employees who must sign a receipt for the same, in order to insure their safe return.

The Genealogical Department is very widely used, and much appreciated by those interested in genealogy and early history of colonial and revolutionary days. Many flattering comments are made by those who are familiar with this collection.

The United States government patents and drawings, also those of Canada, which are all up to date, and an old collection of English patents and drawings are all most valuable. These specifications and patent drawings are in great demand by patent lawyers, and also patentees who are seeking information which will help keep them from infringing on others.

The great need of more room and more assistance in the library is still the cry, and in view of the fact that the state library was deemed of sufficient importance to be provided for in the Constitution of the Territory and the State, it would seem it should receive better recognition by the General Assembly in the matter of appropriation for maintenance and equipment, thus enlarging the service.

The crowded condition makes it very difficult to continue shelving the flood of incoming material without very arduous work in shifting. This could be taken care of for a number of years if the portion which belongs to the library now being used as a hearings room, which was taken from the library before the completion of the new office building, were restored to it. This additional space could be properly stacked and arranged for a reading room and historical and reference department, and would solve the problem with a very small expense, comparatively speaking, and would also add greatly to its appearance and general service.

During the year 1927 I was away on a leave of absence because of the condition of my health. However, before returning to my official duties I had the pleasure of visiting several large libraries, among them the new public library of Los Angeles, California. The capacity for service and beautiful equipment was most appealing. The wonderful Huntington library, which holds such exclusive and valuable books, manuscripts, etc., is something impossible for me to describe—to have any idea of its value one must see it for one's self.

The state library of California, which is located at Sacramento, the public library at San Francisco, also those at Seattle and Portland, are all among those which I have had the pleasure of visiting during this biennial year; also many smaller libraries in our own and other states. When many people would have been basking in the rays of the sun, lying on the beach, I was spending many happy hours in the libraries. However, I did not fail to find much pleasure and sunshine. The shimmering grains of sand upon the ocean beach were strikingly suggestive of the many brilliant thoughts of men and women which have been gathered together in printed form and then placed within the reach of those who come searching for inspiration, knowledge and amusement, upon open shelves in libraries. So it seems to

me that there can be no department of the state more worthy of proper maintenance and recognition than the state library. Therefore, I feel most anxious that the General Assembly of 1929 should give due consideration to the budget recommendation. A statistical report follows.

Respectfully submitted,

ANNIE PARKER HYDER,
Assistant State Librarian.

Assistant State Librarian.

NORMAL INSTITUTES

The state is divided into thirteen normal institute districts.

A normal institute may be held annually for a term of not less than two weeks in each normal district of the state.

An executive committee of not more than three of their number is selected annually by the county superintendents of each institute district, who, with the advice and consent of the Superintendent of Public Instruction and the President of the State Normal School, determine the time and place of holding such normal institute, and select a conductor and instructor for the same.

The expense of the institute is met by the payment of one dollar registration fee from each person attending, and two dollars appropriated by the board of county commissioners for each

person in attendance; also a fee of one dollar paid by each applicant for a teacher's certificate.

Five per cent is added to the average standing in examination of teachers who attend the normal institute.

All disbursements of the "Normal Institute Fund" shall be upon the order of the executive committee, and no order shall be drawn on said fund except for claims approved by said committee for services rendered and expenses incurred in connection with the normal institute.

For the purpose of organizing and maintaining teachers' normal institutes the state shall be divided into the following institute districts, viz.: The counties of Sedgwick, Phillips, Logan, Yuma, Washington and Morgan to constitute normal district No. one (1).

The counties of Weld, Jackson, Larimer and Boulder to constitute normal district No. two (2).

The counties of Arapahoe, Denver and Adams to constitute normal district No. three (3).

The counties of Gilpin, Clear Creek and Jefferson to constitute normal district No. four (4).

The counties of Douglas, Elbert, El Paso, Park and Teller to constitute normal district No. five (5).

The counties of Kit Carson, Lincoln and Cheyenne to constitute normal district No. six (6).

The counties of Fremont, Custer, Chaffee, Lake and Pueblo to constitute normal district No. seven (7).

The counties of Kiowa, Crowley, Otero, Bent, Prowers and Baca to constitute normal district No. eight (8).

The counties of Huerfano and Las Animas to constitute normal district No. nine (9).

The counties of Saguache, Costilla, Conejos, Rio Grande, Alamosa and Mineral to constitute normal district No. ten (10).

The counties of La Plata, Montezuma, Archuleta, Dolores and San Juan to constitute normal district No. eleven (11).

The counties of San Miguel, Ouray, Hinsdale, Mesa, Delta, Montrose and Gunnison to constitute normal district No. twelve (12).

The counties of Pitkin, Eagle, Summit, Garfield, Routt, Rio Blanco, Moffat and Grand to constitute normal district No. thirteen (13);

Provided, That new counties formed within the limits of any institute district shall be a part of said district.

The following Normal Institute Districts held institutes for two weeks during 1927:

		Amount Apportioned
District No. 8.....	Springfield	\$549.21
District No. 9.....	Trinidad	549.21
District No. 10.....	Alamosa	549.21
District No. 11.....	Fort Lewis	549.21
District No. 12.....	Gunnison	549.21

Amount apportioned to districts holding institutes under the following ruling of the Attorney General's Department, June 23, 1924:

"In case Normal Institute District Number Three does not hold a session during the year 1924, such sum

as would have been distributed to it may be apportioned equally between the other twelve normal institute districts.”

WAYNE C. WILLIAMS,
Attorney General.

Signed by
P. J. O'CONNELL,
Assistant.

NOTE: The question regarding the apportionment of the state normal institute fund has been one of doubt, due to the fact that many of the institute districts did not hold institutes and were not given their share of the institute fund. Therefore, a second opinion, asking for a correct interpretation of the school laws providing for the annual apportionment of the Normal Institute Fund, was requested and the following given, October 3, 1928:

“(Section 302, School Laws of 1927.) Said Section reads as follows:

‘Apportionment of normal institute fund.—At the time of apportioning the state school fund in July of each year, the superintendent of public instruction shall apportion the state normal institute fund equally among the normal institute districts of the state, and the sum accredited to each normal institute district shall be transmitted to the custodian of the normal institute fund thereof in the same manner as each county’s apportionment of the state school fund is now transmitted to the county treasurer; and each district’s apportionment of the state normal institute fund shall be applied and expended in the same manner and for the same purposes as the fund of each normal institute district has heretofore been applied and expended.’ ”

This section directs the state superintendent of public instruction to apportion the state normal institute fund **equally** among the normal institute districts of the state, and there being no exceptions or provisos in said section authorizing an apportionment in any other manner, we are of the opinion that the directions contained in said section are mandatory and that you have no authority in making such apportionment to ignore any of the said normal institute district for the reason that no institute was held in such district during the year preceding such apportionment, or for any other reason.

We are not unmindful of the fact that on June 23, 1924, this office rendered an opinion to the then state superintendent of public instruction that the portion of one normal institute district which held no normal institute during the year 1924, might be apportioned equally between the other twelve normal institute districts, but upon a reconsideration of this matter, we believe that such is not a proper interpretation of said section.

Very truly yours,

WILLIAM L. BOATRIGHT,
Attorney General.
A. L. BEARDSLEY,
Assistant Attorney General.

Apportionment of Normal Institute Fund 1928

RADIO SUPERVISION OF RURAL SCHOOLS

During the months February to April, inclusive, 1927, service was furnished the rural schools of the State by personal contact in supervision. Beginning May 1, 1927, work was confined to the office and plans of procedure were changed because funds for traveling expenses were not available. Owing to this unavoidable condition a new departure in rural education was conceived and put into practical operation with the beginning of the school year, September 1, 1927, viz.: radio broadcast education and rural supervision of the schools of the entire State.

With the opening of the public schools, every Thursday afternoon a one-half-hour discussion of education problems pertaining to that week was given over KOA at Denver. Where radios were available in the school room pupils and teachers listened and took notes for use during the week. In other districts where radios were not part of the school equipment, those interested in local school work met in groups at some home in the neighborhood where a radio was to be found.

During the school year every subject pertaining to rural educational advancement, not only the daily routine of studies in all subjects required to be taught in the public school, but the problems of school officers, as county superintendents and school directors, the practical value of parent-teacher co-operation in P. T. A., the tax problem for school maintenance as it concerns all taxpayers, in fact, a general tying up of the state Department of Public Instruction with all, not only near but remote rural schools in Colorado.

AMERICAN EDUCATION WEEK

November 7-13, 1927

November 7-13, 1927, has been proclaimed as **American Education Week**. The purpose of observing Education Week is to acquaint the public with the actual work of the schools, with their ideals, their achievements, and their needs. This custom has grown up within recent years to awaken public opinion to the needs of an education for every individual and to arouse interest in the public school which is the greatest power in the universe in training in the principles of democracy and public duty.

The proclamation issued by William H. Adams, Governor of Colorado, is one worthy of the consideration of every individual in the State of Colorado.

The program for this year emphasizes the seven cardinal objectives of education, which are as follows:

- | | |
|---|------------------------------|
| 1. Sound health. | 4. Faithful citizenship. |
| 2. Worthy home membership. | 5. Vocational effectiveness. |
| 3. Mastery of the tools, techniques and spirit of learning. | 6. Wise use of leisure. |
| | 7. Ethical character. |

Monday,	November	7—	Health Day.
Tuesday,	November	8—	Home and School Day.
Wednesday,	November	9—	Know Your School Day.
Thursday,	November	10—	School Opportunity Day.
Friday,	November	11—	Armistice Day.
Saturday,	November	12—	Community Day.
Sunday,	November	13—	For God and Country Day.

In the belief that a period of concentration on our educational problems will promote the welfare of this commonwealth, I, Katherine L. Craig, State Superintendent of Public Instruction of Colorado, hereby proclaim November 7-13, 1927, as **American Education Week**, and urge that it be observed throughout the State.

Given under my hand and the seal of the Department of Public Instruction, State of Colorado, in the Capitol, at Denver, November First, Nineteen Hundred and Twenty-seven.

KATHERINE L. CRAIG,

(Seal) State Superintendent of Public Instruction.

DEPARTMENT OF PUBLIC INSTRUCTION PROCLAMATION

Constitution Day Week—September 11-17, 1927

As State Superintendent of Public Instruction of Colorado, I am requested by the Constitution Anniversary Association to ask all the school children in this broad State of ours to co-operate in the worthy observance of **Constitution Week** which is from September 11 to 17, 1927, and in recognition thereby, I, Katherine L. Craig, State Superintendent of Public Instruction, do hereby proclaim for the schools of Colorado the observance of this week in commemoration of the anniversary of the Constitution which was approved one hundred forty years ago.

There are six objects designated in the Preamble of the Constitution of the United States in which some of the ideals of our nation are expressed, that is: to form a more perfect union; establish justice; insure domestic tranquility; provide for common defense; promote the general welfare, and secure the blessings of liberty to ourselves and our posterity.

Here, at our hands, lies the task God sets us. It is the development of our inner life, the enriching of our minds, the purification of our hearts, the education of ourselves through liberty and labor, justice and common good for our fellow man.

By faithful adherence to the principles with which our national life began, we have grown to be a prosperous and mighty people. We have been taught to cherish these principles as being scarcely less sacred than our religion.

The very first amendment to the Constitution guaranteed to the people certain types of freedom.

The **Thirteenth** Amendment gave the negro freedom from servitude.

The **Fourteenth** gave him freedom in citizenship, and the **Fifteenth** gave him freedom of the ballot.

The **Nineteenth** Amendment gave the women of this country the freedom of the ballot. Thus we see that our whole Constitution is permeated with the ideal of liberty and freedom. Even the salute to the flag closes with the words, "with liberty and justice for all."

It is the duty of every citizen to study this document of high ideals, and the law provides that there shall be given regular courses of instruction in the Constitution of the United States in all public and private schools located within the State of Colorado. I therefore urge the obedience of the law and the observance of **Constitution Week**.

Given under my hand and the seal of the Department of Public Instruction, State of Colorado, in the Capitol, at Denver, September Twelfth, Nineteen Hundred and Twenty-seven.

KATHERINE L. CRAIG,

(Seal)

State Superintendent of Public Instruction.

ARBOR DAY PROCLAMATION

April 20, 1928

In my official capacity, as State Superintendent of Public Instruction of Colorado in compliance with the laws of the State of Colorado, I hereby designate the week of April 22-28, inclusive, 1928, as American Forest Week, and Friday, April 20, 1928, as Arbor Day for the State of Colorado; and also that Friday, April 20, 1928, be observed as Bird Day in the Public Schools of this State.

Arbor Day, as originally instituted, was for the purpose of planting trees in a region nearly destitute of trees, and where the need of them for fuel as well as for shelter was strongly felt, but now its observance has spread all over the country, and since it has become universally connected with the schools, the planting of trees is second only in importance to the preservation of the native forests and the engendering of feeling and principle that go to influence life and character.

The forests of Colorado are confined mainly to the mountain ranges, extending in a north and south direction through the central portions of the State. The early settlers of Colorado found not less than 36,000 square miles of forest area which was heavily wooded with various kinds of valuable pines and spruces.

For many years no forestry laws were enacted. Much of this valuable timber was destroyed by fire and wanton waste until only about 6,000 square miles remained. If this is true, we have destroyed and wasted more timber than any other people in so short a time. Therefore, the value of observance of Arbor Day must be twofold, not only the planting of trees, but their protection as well.

The predominant species of trees grown in the forests of

Colorado are yellow and white pine, spruce and fir. Some of the kinds of trees which are foreign to the State that are growing here, are the

Ehn	Butternut	Birch
Ash	Horse Chestnut	Oak
Locust	Buckeye	Willow (some species)
Maple	Catalpa	Poplar (some species)
Walnut	Linden	Sycamore

Plant for use, plant for beauty, plant for those who are to follow. The little we do in the world lends advantage for all time to come.

Given under my hand and the seal of the Department of Public Instruction, State of Colorado, in the Capitol, at Denver, April Sixteenth, Nineteen Hundred and Twenty-eight.

KATHERINE L. CRAIG,

(Seal)

State Superintendent of Public Instruction.

AMERICAN EDUCATION WEEK

November 5-11, 1928

A permanent world-wide movement is spreading throughout America and taking root in other countries under the leadership of the World Federation of Education Associations to set aside each year one week for rededication to the cause of universal education and for a deeper understanding of the ideals, achievements and needs of the schools. The week which will be set aside for this significant event will be the one which includes Armistice Day, November 11.

Education is the foundation of civilization. The future of world civilization lies in the education of the youth of today. Where there is no education there is no civilization. The free public school is a mighty force in the assurance of liberty, achievement and unity.

The purposes and ideals of American Education Week are to acquaint the public with the actual work of the schools, their achievements, their ideals and their needs.

Parents are requested to visit and acquaint themselves with the work of the schools and obtain a clearer understanding of the role education has played, is playing, and must play in the life of our great democracy.

Now, therefore, I, Katherine L. Craig, State Superintendent of Public Instruction of Colorado, recommend to the superintendents, principals, teachers and parents that where practicable observe American Education Week. Give thought and assistance to the biggest enterprise in the world, our American Public Schools.

Suggestions for Making a Program—The following suggestions are offered by the American Legion, the National Education Association, and other organizations to aid in the preparation of programs for American Education Week. The purpose of this week is to acquaint the public with the work of the school, with their ideals, their achievements, and their needs. Let the aim be to have every parent visit his child's school at least once during the week. Evening sessions may be substituted for afternoon sessions on certain days. For some time prior to Education Week,

articles on the schools should appear in local newspapers. Note that this program emphasizes each of the cardinal objectives of education; health; worthy home membership; mastery of the tools, technics, and spirit of learning; faithful citizenship; vocational and economic effectiveness; wise use of leisure; and ethical character.

Health Day, Monday, November 5—Health is the foundation of the individual happiness and community well-being. Health Day programs can show the public what the schools do to promote health through recreation, nutrition, ventilation, and training in good habits. An adequate schoolplant—sanitary, spacious, cheerful—helps to improve individual and community life and to insure a better race.

Home and School Day, Tuesday, November 6—Home is the most fundamental institution among civilized peoples. Its co-operation with the school is a necessity. American Education Week is a good time for parents to visit the school and for teachers to plan visits to the homes of their pupils. Let the pupils know what each of them can do to help make better homes.

Know Your School Day, Wednesday, November 7—Schools are the first and biggest enterprise in locality, state, or nation. A little invested in education saves much expended on poverty, disease, and crime. The school teaches children how to learn, to think, to develop vision, to judge, to do, and gives them an appreciation of the spirit of learning.

School Opportunity Day, Thursday, November 8—To help every child find his field of service and to prepare him for it is a primary responsibility of the school. On this day show the opportunities offered children in your community—how vocational efficiency is promoted through courses in agriculture, trades, and industries, commerce, and home economies; how advantages are afforded by special classes and evening schools.

Citizenship Day, Friday, November 9—The success of a democratic government depends upon the faithful performance by each citizen of his public duty. By living as citizens of the schools, children learn to be citizens of the larger society. Schools eliminate factional and national hatreds and develop that mutual sympathy, respect, and understanding essential to loyal citizenship.

Community Day, Saturday, November 10—Education is a lifelong enterprise. The program for this day will emphasize the value of schools in the advancement of community life. Progressive communities provide for wholesome leisure activities—libraries, parks, playfields, auditorium—and make the schoolhouse a community center.

Armistice Day, Sunday, November 11—Ten years ago today the thought of the world changed from war duties to the peaceful pursuits of life. On this day let the ministers of all denominations tell what teachers and the schools are doing to build citizenship and character. Call attention to the fact that Education Week is now observed in other countries as suggested by the World Federation of Education Associations. Note the formal observance of Armistice Day under the auspices of the American Legion will be on Monday, November 12.

KATHERINE L. CRAIG,
State Superintendent of Public Instruction.

**FORTY-SECOND ANNUAL MEETING OF THE COLORADO
ASSOCIATION OF COUNTY SUPERINTENDENTS
AND INSTITUTE WORKERS**

April 4 to 7, 1927

Headquarters, Shirley-Savoy Hotel

MONDAY EVENING, APRIL 4

President's Dinner, Shirley-Savoy Hotel

6:30—Toastmaster, F. A. Ogle, President of the Association.
Community Singing, led by J. C. Kendel, Supervisor of Music,
Denver, Colorado.

Roll Call of County Superintendents.

Response—Paraphrase, Stanza or Verse.

Address, Dr. Geo. W. Frasier, President Colorado State Teachers College.

TUESDAY MORNING, APRIL 5

9:00—Spelling Contest, House of Representatives.

Group Contests in Oratory, State Capitol. Place to be assigned.

11:00—Final Oratorical Contest, Senate Chamber.

Executive Committee

Miss Katherine L. Craig, State Superintendent of Public Instruction, Chairman.

President, F. A. Ogle, Superintendent of Schools of Weld County, Greeley, Colorado.

Vice-President, Miss Lillian Baker, Superintendent of Schools of Rio Blanco County, Meeker, Colorado.

Secretary, Miss Trix Croft, Ex-Superintendent of Schools of Kiowa County, Eads, Colorado.

Treasurer, Mrs. Martha M. Thorne, Superintendent of Schools of Huerfano County, Walsenburg, Colorado.

Chairman of Spelling Contest, S. J. Shadel, Superintendent of Schools of Las Animas County, Trinidad, Colorado.

Chairman of Oratorical Contest, Mrs. Alice Cook Fuller, Superintendent of Schools of Larimer County, Fort Collins, Colorado.

Spelling contest was won by Edward Rice, Huerfano County.

Oratorical contest was won by Eva Reed, Morgan County.

**ANNUAL MEETING OF COUNTY SUPERINTENDENTS AND
INSTITUTE WORKERS**

April 2 to 4, 1928

Headquarters, Shirley-Savoy Hotel

MONDAY EVENING, APRIL 2

6:30—Presidents' Banquet, Shirley-Savoy.

Toastmaster, President of Association, Mrs. Lillie O. Baker.

Music led by Mr. J. C. Kendel, Supervisor of Music, Denver, Colorado.

Roll Call of County Superintendents.

Response, Short Selection from the Bible or Original Verse.

Greetings State Superintendent of Public Instruction, Miss Katherine L. Craig.

Reading, Mrs. Lou Beaman.

Address, "As an Educator Thinketh, So Is He," Dr. Richard Aspinall, President Western State College.

TUESDAY MORNING, APRIL 3

9:00—Spelling Contest, House of Representatives.

Group Contest Oratory, State Capitol.

11:00—Final Oratorical Contest, Senate Chamber.

WINNERS OF THE STATE SPELLING AND ORATORICAL CONTEST

1928

Spelling

1. Ruth Schenkeir, Tioga, Huerfano County.
2. Harriett Henke, Wray, Yuma County.
3. Sarah Sutherland, Grand Junction, Mesa County.
4. Elsie Bruhn, Kiowa, Elbert County.
5. William Gambill, Jr., Boulder, Boulder County.

Oratorical

1. Catherine Mitchell, Sterling, Logan County.
2. Robert Gholson, Las Animas, Bent County.
3. Morris Warner, Thatcher, Las Animas County.
4. Billy Hulen, Brighton, Adams County.
5. Bert Boise, Alamosa, Alamosa County.

Executive Committee

Chairman, Miss Katherine L. Craig, State Superintendent of Public Instruction.

President, Mrs. Lillie O. Baker, Superintendent of Schools, Pueblo County.

Vice-President, Miss Minnie L. Rimmer, Superintendent of Schools, Bent County.

Secretary, Miss Laura Burchsted, Superintendent of Schools, Morgan County.

Treasurer, Mrs. Alice Cook Fuller, Superintendent of Schools, Larimer County.

Chairman Spelling Contest, Mrs. Alice Cook Fuller, Superintendent of Schools, Larimer County, Fort Collins, Colorado.

Chairman Oratorical Contest, Miss Flora Allison, Superintendent of Schools, Logan County, Sterling, Colorado.

Chaperons

Boys, Mr. Earl Morand, Denver.

Girls, Mrs. Elizabeth V. Crow, Denver.

Appreciation

The county superintendents of Colorado deeply appreciate the generosity of the following persons: Hon. F. G. Bonfils, Denver Post, for \$300.00 for prizes for contestants. To Mr. Fred Syman for assisting in furnishing the pins and badges. To Mr. Ed Bishop, manager of the Colorado Theatre, and Mr. Lewis Hellborn, manager of the Orpheum Theatre, for their exceeding kindness in giving free shows for the boys and girls.

**STATE WINNERS FOR COLORADO IN THE 1926-1927
NATIONAL SAFETY CAMPAIGN****First Prize—Gold Medal and Fifteen Dollars**

Annie Brothers, Bessemer School, Pueblo.

Second Prize—Silver Medal and Ten Dollars

Maurice Langley, West Point School, Yuma.

Third Prizes—Bronze Medal and Five Dollars

Harold Curtice, Central School, Pueblo.

Bethel Pugh, Central Junior High, Pueblo.

Martha Williams, Junior High School, Grand Junction.

Eugene Robertson, Aaron Gove Junior High School, Denver.

Edward C. Riggs, Aaron Gove Junior High School, Denver.

Gertrude V. Manning, Park Hill School, Denver.

The essay by Annie Brothers represented Colorado before the national judges.

The best lesson was written by Miss Ruth E. Dalton, a teacher in the Bessemer School, Pueblo.

**Highway Education Board, Architects Building
Washington, D. C.**

**STATE WINNERS FOR COLORADO IN THE 1927-1928
NATIONAL SAFETY CAMPAIGN****First Prize: Gold Medal and Fifteen Dollars**

Katherine Krueger, Junior High School, Grand Junction.

Second Prize: Silver Medal and Ten Dollars

Alva H. Jones, Anton.

Third Prizes: Bronze Medal and Five Dollars

Betty May Poling, Park Hill School, Denver; Leona Punshon, Burlington School, Burlington; Alan W. Lutz, St. Patrick's School, Denver; Frances Weber, Central Jr. High School, Pueblo; Winfred Hauptli, Wellington School, Wellington; Joe Rebol, Bessemer School, Pueblo.

The essay by Katherine Krueger will represent Colorado before the national judges.

The best lesson was written by Mrs. Isabel M. L. Hummer, a teacher in the Park Hill school, Denver.

**Highway Education Board, Architects Building,
Washington, D. C.**

ADAMS COUNTY

The county of Adams was organized on December 3, 1902.

At the time of the organization of the county there were thirty-one school districts with a school population of 677. Many of the districts were very large. One was twelve by eighteen miles. This very large school district was only subdivided in 1921.

In order to care for the 677 children of school age in Adams County in 1903, forty-eight teachers were employed. The present school census shows 5,747 individuals of school age resident in the county and 185 teachers employed in forty-two districts.

From records in the county it is found that the first board meeting in Adams County was held December 30, 1867, and the first school house was built in 1868 at a cost of \$494.17.

Six high schools are now maintained in the county.

The County Library is a feature of the educational work of the county. This library was organized in 1915 by the county superintendent, Miss Helen Lamb. The headquarters are in the county superintendent's office. The library consists largely of supplementary readers, professional and reference books for the teachers, and is supported by voluntary contributions from the districts. At the time of its organization eighteen districts made up the library association. Today every district in the county is represented.

	1902	1928
Number of districts	31	42
Number of teachers	48	185
School census	677	5,747
Number of schools	39	71

ALAMOSA COUNTY

Alamosa is one of the newer counties, coming into existence in 1914. There were sixteen school districts reported in 1916, with an enrollment of 1,290 pupils. About thirty-nine school buildings had been built; five of them "approved" schools, and three "consolidated" schools.

The report for 1928 shows that twenty-five school buildings are used now, with three for exclusively high school purposes.

There are 2,225 pupils receiving instruction from a total of seventy-four teachers. The three consolidated schools are called Mosco, Hooper and Stanley.

Mrs. Minnie L. Brownell, the county superintendent, reports "a quietly progressive and successful year."

ARAPAHOE COUNTY

Arapahoe County, until 1902, included what is now known as the City and County of Denver.

There are now fifty-three schools in the county—six senior high, six junior high, eight elementary, and thirty-three rural. Two particularly fine buildings are the Englewood and Littleton High Schools.

Deer Trail boasts of one of the new consolidated schools which is doing so much to advance the cause of education in the outlying districts.

There is now a total of 173 teachers and 5,628 school children in the county.

ARCHULETA COUNTY

The first school house in the county was a frame structure, built about 1878. It was a one-room, one-teacher school. The county was organized in 1885. At that time there were three one-room schools in the county. By 1893 seven districts had been organized and there were seven one-teacher schools, with an average attendance of fourteen in each rural school and seventeen in the town school. The districts have been divided and subdivided until we now have one second-class and twenty-one third-class districts. There is one superior standard, twelve-teacher school, one approved standard three-teacher school, one approved standard two-teacher school, and twenty-one one-teacher rural schools. There are 1,040 on the present census list.

BACA COUNTY

The territory comprised in Baca County belonged to Las Animas County until April 16, 1889, when it was organized into a county under the present name.

There had been organized in the territory, prior to its organization into Baca County, thirty-two school districts, of which

Minneapolis District, then numbered thirty-five, but changed to one for Baca County, was the first. It was organized on April 9, 1887. First officers were as follows: Jas. Herbert, president; John Minter, treasurer; Ernest Burster, secretary.

During the rapid settlement of the county in 1887 and 1888, ten school districts were organized in 1887 and twenty-one districts in 1888.

Mr. M. Beshoar was county superintendent of Las Animas County when Baca County was organized out of the eastern end of said county. Mr. Chas. Smith was first county superintendent in Baca County.

The first teachers' examination in Baca County was held at two places—Springfield and Stonington—May 31, 1889.

There are now sixty-seven districts in the county.

BENT COUNTY

In 1871 Bent County was 110 miles long and eighty-four miles wide. The first and only school district at that time was Number One, Las Animas, which included Boggsville. The first public school was held in the fall of 1871 at Boggsville. P. G. Scott, president of the Bent County Bank of Las Animas, taught the first term of school at Boggsville. The pupils enrolled in this school were the children of Kit Carson, John Prowers, Tom Boggs, Bent Moore and McKenzie. A map, found in the office records, 1890, shows Bent County with its present boundaries, forty-two by thirty-six miles, and containing six school districts.

The following paragraph is given in order that you may compare the past with the present: In 1878 the records show thirteen teachers in the county who were paid an average salary of \$59.61 per month. These teachers held county certificates only. Now there are eighty-five teachers in the county who are paid an average of \$137.88 per month. They hold twenty State Certificates, twenty-four State Life, twenty-seven county second grade, three county third grade, and eleven county first grade certificates.

The Bent County Teachers' Association has made it possible to carry on the educational work of the county more efficiently. Since the date of its organization, 1920, it continued to function, adding some new feature each year. The first program featured a county spelling contest, and since then has added oratory, declamation and athletics, to the contest list. Increased interest the past two years has made it necessary to hold the County Rural Traek Meet and the Basket Ball Tournament at different dates. This year a primary group will be added to the Declamation Contest.

Miss Minnie L. Rimmer, county superintendent of schools, with the assistance of the committee composed of the superintendent of Las Animas schools and teachers of the association made the first recommendation for county adoption of text books, last fall, and several districts have purchased the books recommended. A county library has been added to the county superintendent's office. A few districts have made liberal donations to the library fund.

Bent County High School and the Las Animas grade schools, under the superintendency of R. L. Hunt, have made these changes during the past four years; the agricultural department has been

increased from two to four years' work. The third year of manual training added, ninth grade history organized to include social science and vocational guidance. A teachers' salary schedule has been adopted by both the Bent County High School and Las Animas boards.

Competitive teams in girls basket ball, stock judging, grain judging and oratory have made remarkable records, including several state, tri-state, western national tournaments and contests. The junior high boys' and girls' basket ball and track teams have been consistent winners in Southern Colorado tournaments.

A band and orchestra director has been added to the teaching staff. There are forty-five in the grade band.

The seventh and eighth grade pupils have been transferred to the Columbian School and a Junior High School organized.

BOULDER COUNTY

Robert J. Woodward, superintendent, 1868, reported thirteen districts, 439 persons of school age; salaries from \$30 to \$100 a month.

The first public school opened in 1860, Mr. A. R. Brown, teacher. Mr. Brown had taught a private school the winter before. The first school house was built in the fall of 1860. This is claimed to be the first school house built in the territory—a one-room frame building, which was used also for town and church purposes.

When the yellow flakes had all been washed out of Boulder Creek, the miners diverted the waters to farms within its valley and schools sprang up wherever communities were established. Fifty active districts are now maintained under a well-supervised system which is completely equipped in every particular. Ninety per cent of all children completing the elementary school live within six miles of a good high school and more than half of these elementary graduates are enrolled in schools of higher learning.

CHAFFEE COUNTY

In 1880 the territory now comprising Chaffee County was detached from Lake County and organized into a separate county. The districts were sparsely inhabited and the schools typical pioneer schools. The county now has thirty districts, which employ a total of sixty-two teachers.

The rural school houses are mostly one-room buildings, Poncha Springs being an exception. There the school building is a well-built and commodious two-story building, containing two rooms on the first floor and a well-furnished community hall on the second. The rural schools are well equipped with furniture, maps and books. As yet no consolidations have been perfected, but it is being freely discussed, and will eventually become a reality. The rural schools without exception, have a nine-month term of school.

Both Salida and Buena Vista High Schools are on the accredited list of all the State institutions and send a very creditable percentage of their graduates to college.

There are twenty-three schools in the county owning text books; and twenty-five districts having libraries. There are twen-

ty-five third-class districts in the county. There were two Teachers' Associations held in the county in 1928, one at Salida and one at Buena Vista.

The schools have done very good work this year. One of the definite aims has been the importance of good reading and good readers. The county organized a Chaffee County Education Association and feel that the meetings have been most profitable.

CHEYENNE COUNTY

Cheyenne County was originally a part of Bent County.

The records of Bent County were burned several years ago when the court house was destroyed by fire. However, there are some records which show that Cheyenne Wells was in District Number 20, which had been formed from unoccupied territory in the northeastern part of Bent County. The records further state that April 1, 1889, school funds (general) were distributed to numerous districts within Bent County and school districts within the boundaries of Otero County and School Districts Numbers 7 and 20 belonging to Cheyenne County.

The first school was held at Kit Carson in 1886 and the second school was taught by Mrs. Timothy Walsh at Cheyenne Wells with an enrollment of six pupils.

In 1888 the second school in Cheyenne Wells was taught by Miss Mary Sullivan, a sister of Mrs. Walsh.

After the forming of the new county, S. C. Perry, of Kit Carson, was the first county superintendent.

During the period from 1887 to 1928 the schools of Cheyenne County have grown until at the present time there is a county high school system consisting of one main school at Cheyenne Wells with branch schools at Kit Carson and Arapahoe. These branch schools are consolidated with busses bringing the children from long distances.

In the year of 1927-1928, 200 students were enrolled in this high school system and thirty were graduated from the four-year course. The faculty consisted of nineteen teachers.

In the county there were thirty-four one-teacher, two two-teacher, one five-teacher and two six-teacher schools. These grade schools with the high schools have an enrollment of 1,024.

CLEAR CREEK COUNTY SCHOOLS

The first organized school district was at Empire, with an average daily attendance of about forty pupils. The primary organization of the public school in Georgetown occurred in 1867. Miss L. H. Lander, an estimable, talented and popular young lady, was the first teacher. School was commenced early in the spring. On the 29th day of the following June, Miss Lander fell from a foot log while endeavoring to cross the creek and was drowned. In 1874 the brick building, which is still in use, was built. Mr. Frank R. Carpenter, a gentleman of rare tutorial ability, was the first principal of the school. Two years later he was elected to the office of county superintendent.

The first brick high school building in Idaho Springs was erected in 1885. The Manual Building was erected in 1906 by Emma Plummer. In 1903 Idaho Springs District Number 5 was organized as a first-class district.

By the end of the year 1890, nineteen districts had been organized in the county, ten of which have now been annulled. Those remaining are District Number 1, Empire; District Number 3, Georgetown; District Number 4, Dumont; District Number 5, Idaho Springs; District No. 6, Silver Plume; District Number 10, Lawson; District Number 11, Brookvale; District No. 12, Free-land; District Number 19, Alice.

CONEJOS COUNTY

The Sisters of Loretto kept a private school in 1870.

A county superintendent was elected in 1870, but failed to qualify.

In 1874 Hon. H. M. Hale, State Superintendent of Public Instruction, reported neither he nor his predecessor could obtain any educational reports from this county.

In 1878 the county superintendent reported the schools in good condition.

At the present time the school population is 3,713, with forty-four schools. Three schools are used exclusively for high school purposes.

There are eighteen districts having libraries containing 4,115 volumes of text books.

The Teachers' Association held two meetings and several classes in connection with the Adams State Normal School in 1927 and 1928.

There are three second-class districts and twenty-six third-class districts.

COSTILLA COUNTY

First public school opened in Costilla County at San Luis in 1866.

San Luis, which is the county seat, is given credit of being the oldest town in Colorado.

Other public schools were opened later on at Fort Garland, San Acacio, Garcia, San Pedro and Chama.

Children attending these schools were of Spanish parents.

The first records of the county were written in 1907. At that time there were twenty-five districts in the county.

In April, 1913, the county was divided. Districts fifteen to twenty-one, inclusive, became part of Alamosa County.

Beginning with Blanca in 1910, we have the formation of the railroad town schools, which are 95 per cent English-speaking Americans.

Blanca, San Acacio (new), Mesita and Jarosa are the strongest schools at present, educationally speaking.

Distances are great between schools, which retards more association and interest.

First Teachers' Association was formed in 1917. Three successful meetings a year have been held since.

CROWLEY COUNTY

Established May 29, 1911. Was formerly the north part of Otero County.

The present school population is 1,916, with approximately twenty-seven schools—five senior high, four junior high, six elementary, and twelve rural.

CUSTER COUNTY

The first public school taught in what is now Custer County was in School District Number 8, in Fremont County in Wet Mountain Valley. A five months' term was taught in the winter of 1871-72 by Miss Louisa V. Verden with twelve pupils. At that time there was a county tax of five mills amounting to about \$4,000 and \$600 per year apportionment from the State.

Custer County grew in population until its public school enrollment increased from twelve in 1871 to 1,100 in 1881. At this time there were seventy-two school districts, Silver Cliff and Rosita having very fine buildings. Mr. Fowler, of Canon City, was the first Superintendent of Public Schools in this county, holding office from 1870 to 1872. Later the population of Custer County decreased. The advent of the railroad in 1881 increased the assessed valuation of four school districts. Several districts were annexed to adjoining ones.

In 1906 the terms of school were lengthened and salaries increased. In April, 1921, the first consolidation was secured. The Wetmore District, No. 9, and two adjoining ones, 10 and 11, voted consolidation, and this school now maintains three teachers and has an enrollment of about sixty-five.

DELTA COUNTY

Established February 11, 1883. Was formerly the northwest part of Gunnison County.

Delta County has today a school population of 5,118 and forty-seven schools.

DENVER COUNTY—THE CITY AND COUNTY OF DENVER

The first school established in Denver was a private school in Auraria in 1859. The school started with an enrollment of thirteen children—two Indian half-breeds, two Mexicans and nine whites. It was started through the efforts of O. J. Goldrick, who later became county superintendent.

No free public school was opened until 1862, when the legislature, at its second session, made its first provision for a school fund by taxation.

In October, 1862, the first elections for members of boards of education were held. District Number 1 was the first to organize, but District Number 2 was the first to open a school.

The upper floor of a roomy two-story brick building on Larimer Street, between Tenth and Eleventh, was rented for this purpose, and three teachers were employed.

Not until 1865, when District Number 2 purchased a small two-room building at Lawrence and Eleventh Streets, did either district possess a building of its own. This was the only school in the district until 1880.

During the infancy of the young territory and the troublous times of the nation, circumstances were not favorable to the growth of an efficient public school system. For seven or eight years affairs were in a very chaotic condition.

By constitutional amendment the City and County of Denver was established December 1, 1902, and the following districts or

portions of districts were included within its boundaries: Numbers 1, 2, 5, 7, 17, 18, 21, 24, 35, 44, 69, 98.

In 1903 the consolidation of the districts was completed. In 1928 the records show 138 schools; five senior high, ten junior high, sixty-four elementary, and 59 kindergarten. The number of pupils enrolled in Denver schools for 1928 was as follows: High schools, 16,140; grade schools, 31,401; night schools, 11,448, making a total of 58,989. The number of teachers employed: 208 men, 1,404 women, making a total of 1,612.

DOLORES COUNTY

Dolores County was created by an act of the legislature February 19, 1881, by the division of an area of Colorado which was at that time known as Ouray County, the San Miguel Mountains being the division line on the north.

The report of 1927 shows a school census of 449, twenty teachers employed and fourteen school buildings in use.

DOUGLAS COUNTY

The first school district organized in Douglas County, at Sedalia, was known as Pioneer Township, and had an enrollment of twenty pupils. At this time, 1865, there were two other schools in the county, one at Franktown, boasting an enrollment of forty-two, and the other at Castle Rock, with eight enrolled.

At present we have thirty-three districts and fifty-three teachers. Enrolled in the schools are 792 children as compared with 153 in 1869.

There are only two consolidated schools in the county, one at Castle Rock and the other at Parker. In many localities consolidation is not feasible.

Douglas County maintains a county high school, established in 1900, the first county high school to be established in the State. At present seven teachers are employed, and about 125 students in attendance. The high school is fully accredited in the Northwest Association. Smith-Hughes work was begun in 1919 and has been successfully carried on since that time.

Parker maintains a four-year district high school, having an enrollment of about twenty-five, and employing three teachers.

All of the thirty-three districts in the county have uniform text books, and all but one district furnishes them free to the children.

Only six districts have less than nine months of school. A few of the districts pay the minimum salary of \$75, but the great majority offer the teacher more.

A county library, consisting of about 250 books, is kept in the superintendent's office and books sent to schools in the districts having subscribed to the library fund, the modest fee being \$12.50 for three years.

EAGLE COUNTY

The first school organized on the Western Slope between Breckenridge, Colorado, and Salt Lake City, Utah, was in Red Cliff in the spring of 1880, by a self-appointed committee.

They employed Miss Dora McMillen as teacher.

Mrs. Greiner, nee McMillen, forty years later was elected county superintendent of schools, serving her third term when death called her.

The second school was organized at Gypsum in the year 1883. Charles Ellis as first instructor. He was paid by subscription—a little money, tobacco, produce and some groceries.

The third school was regularly organized on Brush Creek, which was taught by Miss White, later Mrs. Norton. The first session was in a log cabin that had been used for a blacksmith shop on the H. J. Hernage ranch. Other schools in fifteen districts soon followed.

The first high school in Eagle County was the high school at Gypsum in 1902. O. W. Daggett was the moving spirit in its organization, also of the second high school at Red Cliff. High schools at Basalt, Minturn and Eagle followed at intervals.

ELBERT COUNTY

The school population of this county in 1874 was 201, with six teachers. No further definite history is given for a number of years later.

At the present time there are 2,214 pupils with a number of good schools and two consolidated schools. There are 115 teachers employed in the county.

EL PASO COUNTY

The first public school in El Paso County was organized in 1872 at Colorado Springs, with one teacher and an average daily attendance of thirty-six pupils. A year or so previous to this, a school had been conducted for a short time by Mrs. Palmer, wife of General William J. Palmer, founder of the city of Colorado Springs.

For many years, the only schools in the county were in the western part of the county, along the line of the Denver & Rio Grande Railway. Later, the eastern portion of the county settled up as a farming section and little one-room school houses sprang up over the plains. Many of these have been consolidated in the last ten years until, at this time, there are eighteen consolidated schools in the county, all of them giving a four-year high school course.

At the present time, El Paso County has, exclusive of the Colorado Springs school system, forty-eight schools, employing 160 teachers. Comprising the Colorado Springs school system are twenty-one schools, which employ 275 teachers.

FREMONT COUNTY

Fremont County was settled in 1859. The first public school was established in 1865. It was a log school house located on the corner of Fifth and Main Streets of what is now Canon City.

Later a two-room school was built of adobe, with two teachers employed. At that time, or a short time before that, Miss Frank established a private school on Macon Avenue, where the Jones apartment is now located. This was called the Bryant School. In 1869 Mrs. Bass, wife of Judge Bass, established and conducted a small art school, for a number of years.

In the past sixty years progress has been made to the extent of thirty-six rural schools, one of which is a second-class district, and besides the above-mentioned thirty-six we have two first-class districts comprised of school systems of Canon City and Florence. There are twenty-one one-room country schools, six two-room, two three-room, three four-room, two five-room, one seven-room and one nine-room schools. The equipment is generally good and the school spirit fine.

Canon City, our largest first-class district, comprises a beautiful new senior high school, two junior high schools and seven elementary schools, the assessed valuation of which is estimated at \$8,281,898.

Florence, our other first-class district, comprises one high school and three elementary schools, the assessed valuation of which is \$3,181,300. Penrose, Guffey and Cotopaxi have high school courses along with the elementary schools. Cotopaxi has been accredited during the past year.

GARFIELD COUNTY

There are forty-two districts in Garfield County, two of which are consolidated districts.

Consolidated District Number 1 is composed of Districts Numbers 14, 17, 33 and 35; has a school census of 275, and a valuation of \$757,045. Consolidated Number 2 is composed of Districts Numbers 9 and 30; has a valuation of \$2,024,815, and census of 642.

There are six grade schools, four two-teacher schools and thirty-one one-teacher schools in the county. The total valuation of the county is \$16,991,445. The highest levy made by any district in 1928 was 18.45 mills; the lowest, 2.25 mills.

Garfield County has four union high schools and one county high school, which also maintains a branch at New Castle.

GILPIN COUNTY

On September 9, 1861, two and one-half years after the tide of immigration to the Pike's Peak gold region had set in, the first legislative assembly of the territory of Colorado convened at Denver.

This legislature enacted laws providing for the election in each county of a county superintendent of schools, whose duty it was to divide his county into school districts and establish public schools. Gilpin county was then the liveliest and most populous region in the territory, owing to the fact that "Gregory Diggings," the center of attraction, was very rich and thought to be inexhaustible. At the October election in 1862 David C. Collier was elected county superintendent of schools, and forthwith divided the county into five school districts.

Central City, the county seat, was made district number one and was first to establish a public school.

At the first school meeting held in October, a tax of \$800.00 was levied for the support of a public school and the following winter, 1862-1863, a school was opened under the principalship of Thomas J. Campbell, assisted by Ella F. Kendall, 116 pupils being enrolled during the winter.

At this time a separate school for colored children was established.

An act of the legislature, approved March 11, 1864, amended the charter of the city of Central, thereby giving the city council the entire and exclusive control of the school of said city.

This prerogative being held until April 4, 1899, when, by an act of the legislature, the public schools were placed under the general school law of the state.

In 1864-1865 M. A. Arnold, assisted by his wife, had charge of the school.

In 1865-1866 W. F. Richardson was principal, and the following year John L. Schellenger became principal. The district depended upon renting rooms and was shifted several times during the foregoing period. The year 1868 was the beginning of a new epoch in the history of our schools.

The spring election for city officers culminated in a contest between Democrats and Republicans as to some members of the city council. The election of Hon. Robert Teats (Democrat) for mayor was conceded, but not so several of his party's candidates for aldermen, resulting in two councils and consequently the election of two school boards.

John L. Schellenger continued in the old school under the Democratic administration, and H. M. Hale was invited to take charge of the new.

In June, 1868, Professor Hale, assisted by Mrs. James Burrell, opened school in an old bowling alley that spanned Eureka gulch, where the Teller House now stands. To this school the colored children were admitted in common with the others.

The new school board by an act of replevin got possession of the unpainted pine desks belonging to the district, and moved them into the new quarters.

No sooner had they been placed in position after having been repaired and painted when they were re-replevined by the old board and ruthlessly ripped up and moved back to their former home. The new administration, nothing daunted, telegraphed to Chicago for a sufficient number of modern desks, which, in due course of rail and mule transportation, arrived and were set up. These, we believe, were the first patented school desks coming to Colorado. By using the long pine forms that had previously done service in the colored school, with some cheaply constructed benches and some chairs and tables furnished by the pupils, together with a teacher's desk made by Mr. Hale himself, the new school continued operations without further hindrance.

The old administration had the advantage of having in its possession all the funds, the sympathy of the county superintendent and the treasurer, while the new school relied solely on the justice of its cause and on the ultimate decision of the courts.

The teachers' faith made the warrants a sufficient equivalent for their services, especially as they passed current among the business men. Long before the courts had decided that the new was the legal administration the school portion of the fight had been adjusted by the resignation of Mr. Schellenger and the arrival of the new furniture. The old bowling saloon could not house both schools, so steps were at once taken towards building a house commensurate to the wants of the district. The action of the school board was accelerated somewhat by the action of the

elements in the shape of one of those sudden floods that swept down Eureka gulch, leaving the three school room floors covered to a depth of several feet with mud. At the city election April 5, 1869, bonds to the amount of \$15,000, bearing 15 per cent interest, were voted for the purpose of erecting a school house. The bonds were soon placed in the district and work was immediately begun on the first permanent public school house in Colorado. It is true that other localities had built structures which were used for schools and other town purposes, but Central City is justified in claiming that there is not in the state a public school house used as such whose erection antedates the laying of the corner stone of hers. The total cost of site, building, fence, bell and furniture was \$20,000.00. It was completed and put in use October 26, 1870.

It soon became apparent that the mistake usually made by thriving communities had been made. The school house was too small. The parish school in the basement of the Episcopal church, the German school and the Catholic school relieved the public school in a measure. In 1872 the parish school suspended, leasing its room and furniture to the city, and a department of the public school was therein established. The fire of 1873 destroyed this building and other rooms were rented. The German school suspended and their house was rented by the district, relieving the pressure for a time.

The private schools all being absorbed by the public school the number of teachers was increased to six, and the school was fairly entitled to be ranked as a graded school.

In 1874 the Catholics built St. Aloysius Academy which thrived for a number of years; finally for lack of pupils it closed its doors.

H. M. Hale continued in charge of the school with the exception of one term, filled by N. M. Ambrose, until July, 1873, when he resigned to accept the appointment of superintendent of public instruction for the territory of Colorado. John L. Jerome was elected principal for two years. He was succeeded by M. A. G. Brown, a southerner, who remained one year, when I. C. Dennett was chosen principal, entering upon his duties September, 1876. At the close of the year Mr. Dennett, having secured a position at the state university, resigned. H. M. Hale was recalled to his old position as superintendent, taking charge in January, 1878. Mr. Hale, known as "Daddy" Hale, was hailed with delight by parents and pupils, he having the pleasure of teaching the children of his former pupils.

In 1873 the Miners' and Mechanics' Institute of Gilpin county, having dissolved its organization, offered its library of more than 1,000 volumes of miscellaneous and standard works to the school for the nominal sum of \$300. Mr. Hale, in less than two hours, had the amount pledged by the citizens and the books were at once placed in the public school. Thus was established the first public school library in Colorado. Over 1,500 volumes have since been added, besides many valuable public documents.

In the summer of 1881 the district bought the Congregational church building, converting it into four school rooms, furnishing each with single desks. Mr. Hale managed the school until 1887 when he was called to be the president of the state university.

Superintendents succeeding Mr. Hale to the present time

were: E. C. Stevens, J. A. Smith, J. H. Troendly, W. F. Keim, J. F. Keating, M. F. Miller, H. C. White, F. H. Clark, J. H. Barker, L. B. Swaggert, Geo. R. Momyer, E. G. Green, A. L. Bramhall, F. H. Clark, A. S. Jessup, W. H. Wolfe, C. T. Zumwalt, J. M. Lord, R. C. Travis, Charles W. Gulick, J. H. Lambert, Robert A. Patterson.

In 1908 the Central City high school was united with Black Hawk, Russell Gulch and Apex, forming a Union High School. In 1921 the Union High was changed into the present County High School.

During the period 1887-1900 increasing demand for more school room was relieved by the addition of two rooms to the stone building and later an additional room was rented in the lower part of the district.

Increasing demand for more and better school room caused the district to build an up-to-date building of six rooms, now known as the Clark building. The schools were then carried on by a corps of fifteen teachers with a seating capacity of 500.

GRAND COUNTY

The first school district of Grand county was organized January 3, 1876, and comprised the entire county. The first school census in February of the same year showed a total of twenty-nine children between the ages of five and twenty-one.

The first school was held in a dug-out on the bank of the Grand river. This is now called the Colorado river. The first teacher was Mrs. John H. Mills. It was of this school that J. Harrison Mills painted his most famous picture, and in which all the pupils were dressed in buckskin.

Between the years of 1876 and 1895, twelve districts were organized. Of this number three were annulled at later dates. Since 1895 eight districts have been organized, making a total of seventeen districts in the county at the present time.

There are two high schools in the county, one the Kremmling Union High, which was organized in 1910, and a high school in District No. 1.

The assessed valuation of the county in 1897 was \$272,453. The assessed valuation in 1928 was \$5,531,240.

The first apportionment on record was in 1897 and was for the sum of \$92.66. This was divided among 148 children. The general fund apportionment in 1928 was \$1,321.89 and was divided among 621 children.

In 1897 was the first eighth grade graduation. This was one pupil only. In 1928 we had thirty-six graduates.

At present thirty-five teachers are employed with salaries ranging from \$75.00 to \$200.00 a month.

GUNNISON COUNTY

In 1881 the enrollment of pupils in the schools of the county was 515, which was very good considering the location of this county. In 1884 the county superintendent reported several new school houses being built, one at the cost of \$8,000.00.

Today the county has thirty-six schools, serving 1,348 school children.

HINSDALE COUNTY

District No. 1 in Lake City, was organized in 1876, just one year after Lake City was an incorporated town. It was not a graded school and had only two rooms and two teachers. The first year reading, writing, spelling, arithmetic and geography were the only subjects taught.

The first teachers were Mrs. Bishop and Mrs. Parsons, and no records can be found giving their credentials.

The first building was used as the school house until 1881 when our high school building was completed. District No. 2 at Capitol City, District No. 4 at Henson, and District No. 6 at Lake Shore have no schools now, as the families have moved away on account of the mining decline. District No. 3, formerly of this county, is now Creede, in Mineral county.

HUERFANO COUNTY

The first school house was built at St. Marys in 1869 and was followed the next year by schools in Cueharas and Walsenburg.

Educational interest and advancement has increased continuously and in 1928 the county is divided into fifty-three school districts, with a school census of 7,033 and a teaching force of 115 well-trained men and women.

Huerfano county supports a county high school which takes care of all high school students except those at La Veta, where a union high school is conducted.

Two private schools are located in Huerfano county, the Ussel Memorial at Walsenburg and St. Georges at Gardner. Eight hundred and five pupils were enrolled in these schools last year.

JACKSON COUNTY

Until 1909 this was a part of Larimer county. At the time that this new county of Jackson was organized they had only seven schools, Walden, Haworth, Cowdrey, Butler, Hebron, Rand and Spicer, and in 1911 the Jackson county high school was organized.

The Walden school then offered the first two years of high school work in addition to the regular eight grades, although they had only three teachers. The six other schools had only one teacher each.

The Cowdrey school was organized in 1885 and the first teacher there was the wife of our present county commissioner, T. Jno. Payne.

JEFFERSON COUNTY

In 1871 the county superintendent reported twenty schools in the county. Of these one-half were log houses poorly furnished, long rudely constructed desks, with benches of like length.

The remaining buildings were frame and brick, commodious and well constructed, with improved desks and seats, supplied with blackboards painted upon the walls, with rooms and hooks for clothes, desks for teachers, and good arrangements for warming and ventilation.

In the establishment of graded schools nothing had been done.

No libraries in any of the districts.

In 1928 there were four senior high schools, three junior high, thirty-three elementary and twenty-nine rural schools, with a total enrollment of 4,825 and employing 185 teachers.

KIOWA COUNTY

When Kiowa county was first formed several schools, which formerly belonged in Bent county, were transferred to the county of Kiowa. These were all located in rural districts, and in each school only one teacher was employed.

The first original school in Kiowa county was organized in the fall of 1898-1899. It was located at the extreme east end of the county, which is now known as Towner Centralized District.

The building was rudely constructed on the prairie by homesteaders who lived nearby. It was sixteen by twelve feet and seated fourteen pupils. Home-made desks were installed, and as the district was so poor the children were compelled to buy their own books and equipment.

The district had only \$60.00 in the treasury, which was all they were entitled to until the next tax collection. Consequently a teacher could be hired for only three months of the year.

As the county became more thickly populated new districts have been organized until today there are twenty-one rural schools, six town schools and one accredited school in the county.

KIT CARSON COUNTY

Since receiving your letter asking for some history of the schools of this county, I have been trying to get something of the sort from several of those whom I knew to be among the first settlers. I cannot get anything from the records in this office, since the old records were burned along with the old court house a number of years ago.

The only thing that I have been able to learn, is that the first school district was at the extreme north part of the county, reached the entire length of the county, which was sixty miles. The first school was held in a private house in the north central part of the county, but I could not learn the name of the first teacher or names of members of the school board. This first district was divided and redivided, and the part remaining of the original district is now called School District No. 39.

LAKE COUNTY

In 1889 there were ten school houses in Lake county, with seventeen teachers. The 1928 census gives a total of 1,594 children of school age in the county.

Forty-four teachers were employed last year, all but eight of which were employed in District No. 2, Leadville.

LA PLATA COUNTY

On January 2, fifty-one years ago, the first school district in La Plata county was organized at Animas City, a village located just north of Durango. This was before the coming of the railroad that made Durango the metropolis of the county. The county was three years old and included Montezuma county when this first district was organized.

District No. 2 included all the western part of La Plata county and Montezuma county. During the same year Districts No. 3, No. 4 and No. 5 were organized.

The earliest county records are from the La Plata mountains but the records give no account of school districts or schools. It is probable that the settlers in the first mining camp had more important records to file as there is no dearth of mining claims in the county records of that date. Parrot City, located a few miles above Hesperus, was in early times the county seat of La Plata county.

The first school house was a crude log building at Animas City. Until a few years ago, when it was burned, this was one of the landmarks of the place. The Animas City school is now located in a four-room stone building.

During the last half century La Plata county has forged ahead industrially and educationally. There are now thirty-seven districts in the county, employing one hundred and thirty-four teachers. Fifty-two per cent of these teachers are normal graduates or better. One hundred per cent have more or less college work to their credit. The work in the schools shows the interest and professional attainment of the teachers.

Uniform books are used throughout the county. Every district furnishes free text books to the children.

Every child in the rural schools has access to the best and latest books for children and each class to as many supplementary readers or classics as they may need or wish to use. This service is rendered by the La Plata County Supplementary Reading Library which consists of several thousand well-chosen books in single copies and in sets. This is supported by a tenth of a mill appropriated every third year by the participating school districts. Every district, excepting the one first-class district, belongs.

The second and third class districts have during the past two years financed a thorough testing program for the schools. The Stanford Achievement Tests have been used for the basic tests. During the 1927-1928 school year the Nation-Wide English Tests and the Every Pupil Scholarship Contests for the high schools have been given in addition to the basic tests. Attainment tests have been given to the primary grades twice during the year.

The school fair in the fall and the May festival in the spring bring the schools together. At these festivals the children exhibit their best work and have athletic and scholastic contests. The Athletic badge contests as issued by the American Playground Association are used as a basis for the sports. The scholastic contests are in the grade subjects and in musical appreciation. Each section of the county is encouraged to have three group meetings with the children each year.

Durango, the only first-class district in the county, has a well-organized school system that ranks among the foremost in the state. Forty-five teachers are employed. The high school grounds have been landscaped and are one of the beauty spots of Durango. The schools have been under the efficient management of Emory E. Smiley for the past twenty-four years.

LARIMER COUNTY

The old records of this county show that in 1868 there were three school districts, seventy-five persons of school age and \$160.00 on hand.

There are now forty-six school districts, 9,628 children of school age, and school property amounting to \$2,917,478.00.

The county superintendent in her 1928 annual report states: "All school work is carried on as usual. A new music supervisor for several rural schools, and a part-time nurse for the entire county have been added to the educational forces.

"New pianos have been purchased in several districts. Many schools are adding playground equipment. New globes have been added in many schools, and the quality of teachers is becoming increasingly good."

LAS ANIMAS COUNTY

Las Animas county was created by an act of the legislature in 1866, and in the early part of the following year the first school district was organized in Trinidad.

In 1927 the county superintendent's report showed 121 school districts in the county, 166 school buildings in use, a school census of 13,338 and 392 teachers employed.

Two county teachers' associations were held in Trinidad during 1927, and there was an increase in the membership of the Las Animas county teachers in the national, state and county associations, with increased interest in local educational associations.

LINCOLN COUNTY

The first school record of Lincoln county is as follows:

"April 11, 1889.

"H. A. Lowell was this day appointed superintendent of schools for the newly created county of Lincoln, State of Colorado.

"District No. 7, now District No. 1, Hugo, Colorado, was organized when Elbert county was organized, March, 1874.

"District No. 40, Bovina, numbered District No. 2 by Mr. Lowell, was organized October 29, 1888.

"District No. 43, numbered District No. 3 by Mr. Lowell, was organized December 26, 1888.

"Joint District No. 21 (Kiowa and Lincoln counties) was organized August 13, 1889.

"District No. 4, Limon, was organized October 21, 1889.

"May 21, 1889. Visited Boyero school. Mrs. J. M. Gruer, teacher. Found seven pupils in attendance and very good order and discipline. This school is held in a sod ranch house at the home of Mrs. Conrad Shaffer."

Note: This sod ranch house is still standing.

During the first year, then, of Mr. Lowell's superintendency, there were five school districts, three having been organized before Lincoln county was formed and two later. There were six schools having an attendance of sixty pupils. There were six teachers, Miss Ellen Walker, Mrs. J. M. Gruer, Mrs. Collins, Miss Julia Doughty, Mrs. Laura Beal, and Miss Mabel Johnston.

Today Lincoln county has forty-five school districts, two

Union High School Districts, sixty-one one-room rural schools, one consolidated school, five centralized schools having three years of high school, and town schools at Hugo, Limon, Arriba, Genoa, Boyero and Bovina, having four years of high school. Hugo, Limon and Arriba are accredited high schools.

One hundred twenty-nine teachers are employed; pupils attending the schools number 2,445; the total school census is 2,826; the average special school tax is seven mills; the county levy for teacher's minimum salary is 3.65 mills; the average cost per month for each pupil, based on average daily attendance, is \$18.40.

Our schools are outstanding because our teachers are highly qualified, using the latest and best methods.

LOGAN COUNTY

In 1888 there were eighty school districts in Logan county. Some of these districts had frame school houses, but most of them were of sod. Sterling, the county seat, was building a brick house where six teachers were employed and a high school department opened.

The county was very sparsely settled, therefore did not advance educationally as would have been the case under more favorable circumstances.

Of late years, however, the county has made great progress. There are eighty-seven schools with a school census of 6,419.

The Logan County Branch High School System is a county unit in organization and administration. It includes every high school in the county, thirteen in all, and enrolled 1,059 students during the past year. There were 191 graduates, ninety-five from Sterling Branch and ninety-six from schools outside of Sterling.

MESA COUNTY

In 1882 Mesa county, which was a subdivision of Gunnison county, had but one school district and seventy-five pupils of school age. The last report made to the state superintendent of public instruction lists thirty-five school districts, employing 246 teachers.

The 1928 school census shows 7,578 children between the ages of six and twenty-one years.

High schools are supported in all parts of the county.

MINERAL COUNTY

Mineral county schools were organized in the fall and spring of 1891.

Mineral county is a small county with three school districts, a school census of 144 and a teaching force of seven.

The Mineral county high school was organized in 1910 and now has an enrollment of twenty.

MOFFAT COUNTY

Moffat county was organized in 1911 with twelve districts. Teachers' wages varied from \$50.00 to \$65.00, warrants being sold at a discount.

In 1927 Moffat county had thirty-four districts, wages varying from \$90.00 to \$125.00 in country schools, warrants being sold at par.

The progress made in such a short time has been wonderful, as this county is practically undeveloped and without transportation.

The teaching force represents the best schools and colleges in the United States. Only two third grade certificates are in force at the present time.

When we consider all the obstacles with which this county has to contend, it is readily seen the reason for progress as it has brought forth loyalty, courage and stamina in teachers and directors.

One of the happiest events to me occurred last May, when attending an eighth grade graduation exercise in a little school house in the farthest corner of Moffat county. It was necessary to travel 200 miles and drive home after the exercise, starting at eleven o'clock at night, arriving in Craig as the sun was rising in the morning. I had my breakfast, rested a little, and went to the office, when at nine o'clock the Moffat County Directors' Association met. At the graduation, there were three eighth graders graduating. The thanks and wishes expressed to the county superintendent in that she had such interest in three children to make such a hard trip was worth more to me than the sacrifice made. But to see those eager faces, who could do otherwise than love them?

The slogan adopted among teachers, directors and county superintendent for this year expresses the attitude of all: "Our best for the schools of Moffat county."

MONTEZUMA COUNTY

The first school in Montezuma county was taught in a log school building on the site of the present town of Maneos, by Miss Lizzie Allen. This was in 1879. Two years later, the first school district was organized in the same vicinity, with about thirty children enrolled.

The amount of money paid for the support of schools in the county did not run above \$200.00 for some years.

Today there is a school census of 2,284 and the property values are \$6,216,630.00.

There are three senior high schools in the county, twenty-eight districts, and eighty-one teachers employed.

MONTROSE COUNTY

The first school district was organized in Montrose county in 1883 and the well-known Senator J. J. Tobin, who for many years has represented Montrose county in the state legislature, was the first principal. Other districts were rapidly formed throughout the county.

MORGAN COUNTY

Morgan county was part of Weld county until 1889.

School districts were first organized in 1883.

Two county teachers' meetings are held in Morgan county each year; the meeting in the fall stresses unity of effort and better acquaintance while the spring meeting features the annual oratorical and spelling contests.

All third-class district teachers meet with the county super-

intendent the first of September each year, at which meeting the new or inexperienced teachers are assisted in making plans for the beginning of school. They are given suggestions as to programs, reading, handwork, etc. Plans are discussed, announcements made and supplies are distributed.

There are six active community education associations which meet as often as convenient.

The county superintendent sends a bulletin to each rural teacher each month and an outline every six weeks followed by questions to be given at the end of the period.

In addition to the state final examination questions, all eighth grade graduates are required to take the Stanford Achievement Test.

OTERO COUNTY

There were eight school districts, with nine schools, in Otero county in 1890; also one union district with Kiowa county. Fourteen teachers were employed. In 1893, forty-one teachers were engaged in instructing 1,753 school children. The La Junta high school established a four-year course at that time.

There is now a school population of 7,067 and 223 teachers are employed.

OURAY COUNTY

This county being situated wholly in the mountains is dependent upon its mineral mined for revenue, hence its school activity reflects the rise and fall of mining output and values.

The first school district was organized in 1876.

The county superintendent reports in 1928, twelve school districts, 517 persons of school age, and twenty-nine teachers.

PARK COUNTY

In 1866-1867 H. A. Tabor was superintendent. In 1869 there were two districts, with sixty-four persons of school age.

The first school was organized in Fairplay early in 1860. School was held in a one-room frame building.

Other one-room schools followed in Alma, Garo, Hartsel, Guffey and in the more remote districts.

These schools were three and four months' schools.

Many eight and nine months' schools by the early nineties.

The first stone school building was built in Fairplay in 1884. This was a two-room building. A full four-year high school curriculum was begun in 1900.

In 1928, Park county had a school census of 514, employed thirty-nine teachers and had a total of twenty-nine school houses in use, two of which were used exclusively for high school purposes.

PHILLIPS COUNTY

The county was a late organization made from a division of Logan, Sedgwick and Yuma.

The 1928 school report records thirty-eight school districts, 1,809 children of school age and a school property value of \$382,802.00.

A county high school serves the whole county with a corps of twenty-one high school teachers.

PITKIN COUNTY

The organization of public schools in Pitkin county dates from August 1, 1881.

The first school district, Aspen No. 1, was organized August 6, 1881. Soon after the organization, a school was opened, a building being rented for the purpose, and maintained for six months of that year. Districts Nos. 2 and 3 were organized during the same year, and each held short terms of school. The total enrollment during the first year was fifty-eight.

In 1883 the school population had increased sufficiently to require the services of two teachers.

Three additional districts were organized in 1886. The school population of the county was 572.

At present school population is 622 with fifteen schools and twenty-six teachers employed.

PROWERS COUNTY

Prowers county was organized in 1889 with thirteen districts.

In 1928 the county was divided into forty-nine districts serving 4,250 school children and employing 164 teachers.

The county superintendent in her annual report for this year states: "All school districts in the county were visited twice and many schools were visited more.

"Bulletins were issued each month from the office to assist and plan the school work. Two education meetings were held for the entire county, one meeting was a health conference held at Holly, the other county meeting was held at Lamar. Both meetings were well attended and very helpful to the teachers.

"The eighth grade examination papers sent in this year showed great improvement. In fact, every line of educational endeavor shows the effects of better teachers and better teaching."

PUEBLO COUNTY

In 1862, the first school in southern Colorado was opened in the city of Pueblo. The building, a frame structure built near the center of the town, has long since disappeared. It was a school supported by subscription, and its teacher was Miss Weston.

School District No. 1 was organized in 1866-1867. In 1870, a two-room adobe schoolhouse, the first public school building in southern Colorado, was erected in Pueblo, on the corner of Eleventh and Court streets, where now stands the Centennial high school building.

In 1874, bonds for a new building were sold, but after the building was started, the district treasurer absconded with a large part of the funds. For over a year no school was held, but in 1876 the new building was opened and called Centennial.

In 1873, a new school district, which was called No. 20, was organized in Pueblo on the south side of the Arkansas river. A one-room brick building was erected on the brow of the hill, and the school was opened in the fall of 1873.

The development of the county schools outside of the city of Pueblo has followed closely that of No. 1 and No. 20. Beginning a considerable number of years following the first schools to be opened in Pueblo, rural school districts and buildings were pro-

1927-28

vided as the lands in the valley were settled. In several of the rural communities, consolidation has taken place and large modern brick buildings erected.

In all there are now forty-five districts in the county, and over 130 teachers, outside of the city of Pueblo.

The city of Pueblo now has two first-class school districts with a total enrollment of 12,476 and employing 434 teachers.

RIO BLANCO COUNTY

Forty-five years ago the first school records filed from Rio Blanco county stated the persons of school age numbered 283, and also that eight school buildings had been erected.

The 1928 report records eighteen district elementary schools and a county high school which rank with the best in Colorado.

Rural schools have added to their supply supplementary reading material through the county circulating library.

Standard tests are used in all the schools.

RIO GRANDE COUNTY

Rio Grande county previous to 1916 contained twenty-six school districts. Since that date the schools of the county have been reorganized and consolidated until at the present time the entire county is embraced in nine districts and the county superintendent in her 1928 report states:

"The schools of Rio Grande county have made very substantial progress during the past year. Except one, every district in the county shows a gain in the census. All of our schools are full and one district, Consolidated No. 8, has added a grade teacher since September 1. Number 18, the two-teacher school, had the best school they have ever had last year. This has been an example for No. 15 and this year they have a teacher of wide experience with a marked advance in salary. I consider this a very forward step.

"Our consolidated schools continue with their splendid programs. These schools have the greatest influence over every phase of community life, and their value cannot be estimated.

"The class of teachers throughout the valley is improving. The record of certificates will bear me out in this statement. As the fertile valleys of our mountains are being settled there is a demand for schools.

"Number 7 has just built a small school at a logging camp to be conducted under their system. Mining activity at Jasper will no doubt bring a demand for a school there."

ROUTT COUNTY

The earliest written school records of this county are dated 1890 and stated the territory of each school district was so large and so cut by high mountain ranges that many children could not secure school privileges, and teachers in many of the districts were isolated from contact with the rest of the world for the entire school year.

The last annual report made by the county superintendent records forty school districts entirely within the county boundaries, two joint districts, one with Eagle county and one with

Rio Blanco county. High schools are conducted at Steamboat Springs, Hayden, Oak Creek and Yampa, and a joint Union High school, the McCoy, with Eagle county.

SAGUACHE COUNTY

The first county superintendent for Saguache county was appointed in 1869. There were thirty school children.

The report for the year 1928 shows eighteen districts, a school census of 1,901 and sixty-seven teachers employed.

SAN JUAN COUNTY

There seems to have been a school in this county as early as 1876. The first record of school tax is 1877.

The county superintendent reports for 1926-1927 as follows: "The school year of 1926-27 proved a very successful school year under the able management of Superintendent S. M. Ludwick. Some changes were made in the course of work offered in our system. By adding a commercial course we were able to better meet the demands of the school patrons.

"The health work begun by the parent-teacher association several years ago is slowly making progress. The health clinic was held in August, 1926, and the follow-up work done by the Red Cross organization, placing a school nurse in our county for six weeks. Much help (physically) has been derived by the children of the county.

"This fall we will continue the health work and carry out plans for improving the play grounds around the building. A manual training class has been organized for this term."

SAN MIGUEL COUNTY

In 1883 the first public school was opened in Telluride in what is now San Miguel county. It was then a portion of Ouray county. The first school board was: James P. Reddick, president; S. H. Blair, secretary; A. B. Cooper, treasurer.

With only \$10,000.00 in taxable property this school board felt it was going to be a problem to secure bonds. However, with the aid of one of the citizens, L. G. Denison, \$3,000.00 in bonds were secured from W. H. Fernhold. They paid twelve per cent interest, payable annually. The bonds ran five years and were paid in full.

Charles Blair was the teacher of this little school which grew and became the foundation of our San Miguel county school system of today, and of which we are justly proud. Today we have a high school which ranks among the best on the western slope, and all the credit should be given to the earnest efforts of people who made sacrifices that education should live and grow in San Miguel county.

SEDGWICK COUNTY

Sedgwick county was organized in 1889. At that time its agricultural resources were but slightly developed, the locality having been settled but four years.

The first annual report from Sedgwick county gave the total school expenditures for the year as \$7,511.26.

The 1928 school report records total school expenditures in the county last year as \$115,191.34.

The county superintendent makes the following report of educational activities: "Over two-thirds of the Sedgwick county teachers of last year have returned to their same schools. This bespeaks progress where the usual slogan seems to have been 'a teacher a year' in the rural districts especially.

"A system of uniform county records is to be adopted soon.

"On February 18, 1928, a county school board association was organized. All but eight districts had representatives there and the first meeting of the organization is to be October 6.

"We had a school nurse last year for five weeks. The children in every rural district were examined and clinics and health classes were held in the towns.

"A county extension class with an enrollment of more than twenty is being conducted in Sedgwick.

"A new Parent-Teacher association was organized last week.

"Ovid is to have a new modern high school building.

"District No. 3 is planning on a new up-to-date rural school.

"We are advancing!"

SUMMIT COUNTY

Summit county was one of the earliest localities settled in Colorado and public schools were established in the seventies.

Like all mining counties money was plentiful during its early history and splendid, well-equipped schools with the best trained teachers available at the time were the result. As time has passed changes have resulted through the lessening of the ore output and the report for 1928 gives only 285 children of school age in the county.

Finishing her report the county superintendent states: "Breckenridge, District No. 1, is doing excellent work under the supervision of L. J. Hall.

"Schools throughout the county very progressive, all having fine instruction.

"Frisco, District No. 9, has a very small enrollment, only one scholar this last week. Families moving to other parts of the state."

TELLER COUNTY

Teller county was organized from a part of El Paso county in the year 1899. The first school, however, was taught in Cripple Creek about 1893. W. E. Pruett was the teacher. In 1897 a class of two was graduated from the Cripple Creek high school, which had been established in 1896. For a number of years the schools grew rapidly. Then came a decline which is characteristic of all mining districts. While the enrollment in the schools has shown a decrease every year the teachers have tried to keep the work up to a high standard. Cripple Creek and Victor have a corps of twenty-eight teachers. Each town has one ward school and a well-equipped high school.

The rural schools show improvement. Better qualified teachers are being employed. At present there are nine rural districts and thirteen teachers.

WASHINGTON COUNTY

The first school established in Washington County was in Akron, in 1886. This consisted of one small room located on Main Street. Miss Hettie Irwin was the first teacher. She taught a six-month term of school at a salary of \$30.00 per month. In 1888 a building on the opposite side of the street was used. Two teachers were employed in this school. In 1914 this school had enlarged until they were then employing four teachers. Miss Mary Kinche-loe was then principal in the school. In 1919 the present grade school building in Akron was built. The building is entirely modern. At the present time Mr. H. V. Allen is the principal of the grade school. There are nine teachers under his supervision. On page 14 of the October number, 1927, of the Colorado Educational Journal, you will find the history of the Washington County High School system. The principal of the grade school in 1914 received a salary of \$80.00 per month. Mr. Allen is now receiving \$200.00 per month.

WELD COUNTY

In 1868, Weld County had ten districts, a school population of sixty-one, and \$2,000.00 school apportionment.

In 1928 there were 135 school districts, a school population of 20,143, and school receipts totaling \$2,460,644.30.

The county superintendent reports: "Two notable accomplishments this year are: First, District Number 110 centralized, eliminating nine one-teacher schools. Second, the per cent of enrollment in average daily attendance was increased nine per cent."

YUMA COUNTY

The first school established in Yuma County was District Number 1, which included then as it does now, the town of Yuma. The records show that the meeting to organize a school district was held in the office of Edwards and Thill on Saturday, March 6, 1886, at the hour of 1 P. M. There were seventeen voters present and sixteen votes were cast in favor of the organization and one vote against. The district was accordingly organized, square in shape, containing sixty-four square miles of territory. The first school board consisted of Ira Edwards, president; N. L. Beach, secretary, and T. W. Babcock, treasurer. The district was in old Weld County, and received the original number 59 by County Superintendent J. B. Cooke.

Since then many changes have come to the Yuma School District which is now a consolidated district, containing eighty-two and seven-sixteenths sections of land with an assessed valuation of \$3,196,377. The school employs twelve teachers in the elementary grades and ten in the high school, including the superintendent. It belongs to the North Central Association of Colleges and secondary schools, and has a total enrollment for the present of 523 pupils, 208 of whom were in the high school, which is organized as a union high school.

The second school organized in Yuma County included then as now, the town of Wray. The records show that it met at Newell's Hotel on April 21, 1886, at 1 P. M. There were ten votes favoring the organization and no vote cast against it. On May 26,

1886, J. B. Cooke, county superintendent of Weld County, enrolled this as District Number 61. It now bears Number 2 in Yuma County, and has a valuation of \$2,388,812. It employs seventeen teachers, including a superintendent, and enrolls the present year a total of 428 children in the elementary school.

DEPARTMENT OF THE INTERIOR, UNITED STATES INDIAN SERVICE

List of Ute Indian children enrolled in public schools, La Plata County, Colorado, December, 1927:

Ignacio		La Boca	
	Age		Age
Frank Bean	16	Randolph Baker	13

MATERNITY AND INFANCY**State Aid**

Appropriations for the Child Welfare Bureau and for Sheppard-Towner work in Colorado for the biennial period 1927-1928 were included by the Twenty-sixth General Assembly in the Long Appropriation Bill.

\$4,000.00 annually for the work of the Child Welfare Bureau.

\$5,000.00 annually for Sheppard-Towner work. This sum to be met by federal aid, dollar for dollar.

Federal Aid

Children's Bureau, Department of Labor, Washington, D. C., granted to Colorado annually for the biennial period 1927-1928 a flat sum of \$5,000.00 for maternity and infancy work in accordance with the ruling of the Sheppard-Towner act.

In addition the Federal Children's Bureau paid to the State of Colorado annually for the biennial period 1927-1928, \$5,000.00 to meet the appropriation of the Colorado legislature on the dollar for dollar basis.

PRENATAL DIVISION

Correspondence Course for Mothers

A series of Prenatal Letters are now being distributed throughout the State.

The series contains ten letters to the pregnant mother complete with a book on infant care and a birth registration card.

Seven hundred letters were sent to the doctors advising them of this procedure and asking for names of prospective mothers.

Two hundred letters were sent to presidents of Parent-Teacher Associations.

Up to date 260 requests have been received in this office.

Prenatal clinics, under the auspices of the Traveling Health Conference, have been held in:

CONEJOS COUNTY

Baby Health Contest at County Fair

The Conejos County Baby Health Contest has been held at the County Fair four successive years.

Prizes were awarded on the progress made by the babies during the year as to diet, health habits and physical defects corrected.

	Number Examined	Number Re-examined
1925.....	37	---
1926.....	20	17
1927.....	28	10
1928.....	25	10

Prizes, 1926—Nine ribbons were awarded by the Child Welfare Bureau.

Prizes, 1927—Three sun suits were awarded by the Child Welfare Bureau to the babies in order to encourage the mothers to give the babies sun baths.

Prizes, 1928—Three cereal sets were awarded by the Child Welfare Bureau, consisting of a bowl for the cereal and a mug for the milk; demonstrating the need of cooked cereal every day for the growing child.

A toxin anti-toxin campaign was organized and put on by the Romeo Mothers' Study Circle. Thirty pre-school children were immunized.

Manassa and Sanford are holding infant and pre-school clinics every few months with the assistance of the local doctors, and have put on several very successful tonsil clinics.

Birth Registration

Colorado was admitted into the birth registration area on August 24, 1928.

Roundup of the Pre-School Child

This was undertaken in 1927 and in 1928.

Organizations holding:

	1927	1928
Spring examinations	43	39
Fall roundup	8
Pueblo, a 100% city registration.		

A Demonstration by the National Association for the Prevention of Blindness

A demonstration of testing eyes of the pre-school child was given in Denver, Boulder and Colorado Springs by Mrs. Jessie Ross Royer, field representative of the National Association for the Prevention of Blindness, under the auspices of the Colorado Child Welfare Bureau.

Press Clippings

- 5,909 Infant Care sent direct to homes at the time of birth of baby.
- 5,300 Prenatal Care sent to wives from marriage license notices.

HANDICAPPED CHILDREN

Facilities for the care of the crippled child in Colorado are equal to the needs. There has never been any difficulty in securing the necessary hospitalization. State charity cases requesting admission to Children's Hospital in Denver are recommended to the Bureau for investigation, the Bureau using its county representatives as investigators.

The two great obstacles to hospitalization are: First, the consent of the parent to surgical or medical correction, and second, transportation to and from the hospital.

In co-operation with the Colorado Crippled Children's Society the Bureau has been able to supply meals, clothes, pullman and transportation to a great many children otherwise unable to get to the hospital.

The Capper Fund for Crippled Children of Topeka, Kansas, has maintained a bed for a crippled child during the greater part of the biennial period.

Agencies co-operating with the Bureau in caring for the handicapped child are:

County Commissioners.

Visiting Nurse Association of Denver, Leadville and Colorado Springs.

County Child Welfare Bureaus.

Denver & Rio Grande Railway Company.

Santa Fe Railway Company.

Colorado General Hospital.

Colorado Psychopathic Hospital.

Children's Hospital.

St. Luke's Hospital.

Shriner's Hospital.

Catholic Charities.

Lions Clubs.

Kiwanis Clubs.

Women's Clubs.

Bureau of Child and Animal Protection.

Capper Fund of Kansas.

County Red Cross Chapters.

All State institutions dealing with children.

Summary of Cases

- 43 counties receiving bureau service.
- 230 children registered for some special care—107 boys, 123 girls.
- 7 out-of-State cases.
- 159 children registered in Children's Hospital.
- 23 children recommended by doctors for correction, but receiving none.
- 2 in hospital but removed without correction.
- 26 children referred to county commissioners.
- 18 financed by county in hospital.
- 59 cases at ward rates.
- 27 cases free.
- 32 at special rates.
- 45 families endeavored to meet hospital expenses.

- 26 families unable to meet obligations.
- 25 families assisted by bureau funds.
 - 4 children cared for by Men's Service Clubs.
 - 2 children cared for by charities.
 - 1 child cared for by the Visiting Nurse Association.
 - 4 children cared for by the Capper Fund.
 - 9 children cared for by the Red Cross.
- 14 children referred to the Bureau of Child and Animal Protection.
- 26 children re-entered one or more times for follow-up observation, change of casts or braces, removal of casts, X-rays, etc.
- 23 cases held over from last biennial period.

BOYS' AND GIRLS' CLUB HEALTH CONTEST AT STATE FAIR

On September 8, 1927, the annual examination of the members of the Boys' and Girls' Clubs was held at Camp Tobin, at the State Fair, Pueblo.

Seventy-five boys and girls were given a thorough physical examination and an intelligence test.

On September 17, 1928, sixty-seven members of the Boys' and Girls' Clubs were given a physical examination.

BIENNIAL REPORT OF THE STATE ORGANIZER OF THE COLORADO CONGRESS OF PARENTS AND TEACHERS

December 1926—December 1928

The Parent-Teacher movement has increased in the number of associations from about 300 to 445, and in membership from approximately 29,000 (1925-1926) to over 48,000 (1927-1928).

Another encouraging feature is the improvement in a better understanding of the real aims and purposes of the movement and the effort being made to reach the standards outlined by the national organization.

UNIVERSITY OF COLORADO

The University of Colorado was incorporated by an act of the First Territorial Legislature of Colorado, in 1861, and the location fixed at Boulder. The act states that the university was "designated to promote and encourage the diffusion of knowledge, in all the branches of learning, including the scientific, literary, theological, legal, and medical departments of instruction." A board of trustees with needful powers was constituted, but never met to transact business. A second act of the year 1870 revived the project of a university at Boulder and reconstituted the board of trustees. In 1872, three public-spirited citizens of Boulder gave the university fifty-two acres of land adjoining the city. In 1874, the Territorial Legislature appropriated \$15,000 to the university, conditioned on the raising by the trustees of an equal amount "by subscription, donation, or otherwise." The trustees having met this condition, the first installment of the appropriation was paid on June 7, 1875. Plans for the erection of a building were then made. In 1875, Congress "set apart and reserved for the use and support of a State university" seventy-two sections of public lands. The Constitution of Colorado, adopted in 1876, made the "University at Boulder" an institution of the State, thus entitling it to the lands appropriated by Congress, and provided for its management and control as follows: "The Board of Regents shall have the general supervision of the University, and the exclusive control and direction of all funds of, and appropriations to, the University." The university is supported by the proceeds of a fractional mill tax and by special appropriations.

The institution was opened September 5, 1877, with two departments, preparatory and normal. In 1891, the normal department was dropped, and in 1907 the preparatory department was discontinued. The university comprises the following schools and

colleges: College of Arts and Sciences, 1878; School of Medicine, 1883; Graduate School, 1892; School of Law, 1892; College of Engineering, 1893; Summer Session, 1904, increased to a full quarter in 1919; College of Commerce, 1906, reorganized in 1923, when it became the School of Business Administration; College of Education, 1908; College of Pharmacy, 1911; University Extension Division, 1912; School of Social and Home Service, 1912, changed to the College of Home Economics and Social Service in 1918, which in turn became the Department of Home Economics in 1920; College of Music, 1920; Department of Journalism, 1923. The College of Education and the Departments of Home Economics and Journalism are divisions of the College of Arts and Sciences.

The university, excepting the Medical School, is situated at Boulder, a city of 15,000 inhabitants, about thirty miles north of Denver.

The university campus at Boulder comprises eighty acres; Stratton Field, northeast of the main campus and about one-quarter mile distant, twelve acres.

COLORADO AGRICULTURAL COLLEGE

The Colorado Aggie campus covers the major portion of 160 acres just a half mile south of the main business section of Fort Collins. Beautiful residence sections adjoin it on three sides, with the college farm on the west.

In the center of the campus proper is an oval drive with beautiful turf and shady lane forming the north and south axis. South of the oval stands the new Administration building. Going westward from the northeast corner of the campus, one passes the Conservatory of Music, Horticultural Hall with its greenhouses and experimental gardens, the Mechanical Engineering laboratories, the main Mechanical Engineering building with its shops and drawing rooms, Guggenheim Hall of Household Arts, the north entrance to the campus which is directly opposite the Administration building, and on the west side of this entrance is Ammons Hall, the club building and gymnasium for Aggie women, and the social center for the entire institution.

Going southward from the northeast corner of the campus, one passes, in succession, the Electrical Engineering building with its two large laboratories, Old Main, the oldest building on the campus, the Botany building, which also houses the Chemical Section of the Experiment Station, the new Men's Gymnasium which is wonderfully equipped to take care of the physical needs of the Aggie men, Agricultural Hall on the hill south of the gymnasium, and south of that, Colorado Field, the home of Colorado Aggie athletes. West of Colorado Field are some of the old war-training buildings, now used by the departments of Veterinary Medicine and Pathology, Animal Husbandry, and Military Science and Tactics. Still further west in what might be termed the southwest corner of the campus, are the livestock barns, the judging pavilion, feeding pens and sheds, etc.

On the west side of the oval, just south of Ammons Hall, are the Chemistry building, Civil and Irrigation Engineering building and the Veterinary Hospital. Back of them are the poultry yards and the hydraulics laboratory. On the east side of the oval facing westward, are the Physics building, the College Dining

Hall, the Entomology building and the central heating plant. The Library is northeast of the oval. South and east of the Administration building is the president's home, very centrally located on the campus.

Seven of these buildings are practically new and nearly all departments are comfortably supplied with class and laboratory rooms. It is hoped that the Twenty-seventh General Assembly will continue our building levy with which to keep the campus building program abreast of increased enrollment.

Half a mile east of the campus proper is located the experimental farm of 152 acres, which, with the seed house and agronomy seed barn, furnishes a field laboratory for experimental work in the improvement of Colorado field crops. Two miles west of the campus, along the first range of mountains, is the college pasture of 1,350 acres. The location is Fort Collins, Colorado.

THE FORT LEWIS SCHOOL OF THE COLORADO AGRICULTURAL COLLEGE

Hesperus, Colorado

The Fort Lewis School, located near Hesperus, Colorado, is under the direction of the State Board of Agriculture and is a part of the Agricultural College system of Colorado.

The officers of the board are:

A. A. Edwards, President, Fort Collins, Colorado.

E. R. Bliss, Vice-President, Greeley, Colorado.

L. M. Taylor, Secretary, Fort Collins, Colorado.

Fort Lewis is located at the foot of the La Plata mountains on an extensive reserve of 6,300 acres of agricultural and timber land owned by the State. Flowing through the reserve is the La Plata river, lined with stately cottonwoods and pines, contributing to the attractions of the valley and supplying water for irrigating crops on the reserve. The altitude is 7,600 feet and the climate is delightfully invigorating and healthful. Pure water, abundant sunshine, fertile fields, the best of Nature's playgrounds for recreation, all combine to make Fort Lewis a most healthful and pleasant place.

Situated in the southwest corner of the State of Colorado, hundreds of miles from any institution of higher learning, in one of Nature's favored spots, is located the Fort Lewis School of Agriculture—a little school that has had large ambitions for the young people who came there. To a certain extent their dream is being realized. The school, though small, has turned out graduates who are making good at college and in their various fields of endeavor. Nearly 50 per cent of its graduates have gone to college and practically all of them have made good.

Now the State Board of Agriculture has seen fit to offer college work at Fort Lewis. No more ideal location could be found anywhere for an institution of higher learning. The climate is ideal—not too cold in winter nor too hot in summer. The campus is beautiful. The surrounding country abounds in scenic beauty. There is no more advantageous location in the United States for the study of geology and archaeology.

COLORADO STATE TEACHERS COLLEGE

Colorado State Teachers College is under the management of a board of trustees of seven members appointed by the Governor of the State. The State Superintendent of Public Instruction serves ex-officio.

The purpose of the college is to train teachers for public school service. Being supported by public taxation of all the property of the State of Colorado, the college aims first to prepare teachers for all types of public schools maintained within the State of Colorado. This includes rural schools, kindergartens, primary, intermediate grade, upper grade, junior high schools, and senior high schools. The college also accepts the responsibility of training supervisors for rural schools, principals, superintendents, teachers of home economies, industrial arts, fine and applied arts, training school teachers, teachers of defective and atypical children, teachers for adult night schools, etc.

While the college is supported for the training of Colorado teachers, it welcomes students from any state or country, and sends its teachers wherever they may be called. Students come to Colorado State Teachers College from many states, and its graduates go in large numbers into the neighboring states and in smaller numbers into distant states and countries.

The maintenance of the college comes from a State mill tax and from special appropriations made by the legislature.

It is the purpose of the trustees and faculty of Colorado State Teachers College to maintain a high standard of scholarship and professional training. Those who are graduated are thoroughly prepared and worthy of all for which their diplomas stand. It is the policy of the school by making all graduates "worthy of their hire" to protect those who employ them, for in so doing it protects no less the graduates and the children whom they teach.

THE COLORADO SCHOOL OF MINES

History

The Colorado School of Mines is the second oldest mining school in the United States. In 1868 Bishop Randall made provision for a school of mines when he established his Episcopal University, one mile east of Golden. Appreciating the efforts of Bishop Randall and realizing the mining opportunities of Colorado, the Territorial Legislature in 1870 made its first appropriation for a building for his school. This building was completed in 1871 and instruction in assaying and chemical tests was begun at that time.

The Colorado School of Mines was legally established by act of the Territorial Assembly, approved February 9, 1874. At this time Bishop Randall transferred his department of mines, consisting of one building and five acres of land, to the territorial authorities. The school now has a campus of twenty-five acres and the work is carried on in ten modern and well-equipped buildings.

The general management of the school is vested by statute in a board of trustees, consisting of five members appointed by the Governor of the State. The first board of trustees met in Golden,

July 6, 1874, when W. A. H. Loveland was chosen president and Captain E. L. Berthoud, secretary, both of whom have been closely associated with the development and history of Colorado.

The financial support of the School of Mines is derived from an annual mill tax of the State.

WESTERN STATE COLLEGE OF COLORADO

Historical Data

1885, 1887, 1889—Unsuccessful bills were introduced to establish a Normal School at Gunnison by Hon. Archie M. Stevenson.

April 16, 1901—Governor Jas. B. Orman signed bill of Hon. Chas. T. Rawalt establishing Normal School at Gunnison, provided site of forty acres be donated, and appropriating twenty-five hundred dollars for planting trees and improving site.

1901—Land was donated by Frank P. Tanner, Joseph Heiner, Dexter T. Sapp, Dr. Louis Grasmuck, C. T. Sills, and part purchased by subscription, in all a tract of approximately forty-three acres.

May 5, 1909—Governor John F. Shafroth signed bill, passage of which was secured by Hon. John Lehr Ritter, Senator W. H. Twining, Senator Dexter T. Sapp, and Senator Wm. Weiser, appropriating fifty thousand dollars for building.

October 25, 1910—Cornerstone was laid for North Hall.

September 12, 1911—School was opened with Dr. Z. X. Snyder, of Greeley, president, and C. A. Hollingshead, principal.

September 15, 1913—L. Allen Keyte assumed duties as acting principal, following the resignation of C. A. Hollingshead.

December 15, 1913—James Herbert Kelley was elected principal.

June 6, 1914—The school was separated from the State Teachers College of Colorado at Greeley, and J. H. Kelley was elected president.

April, 1915—Admitted to full membership in the North Central Association of Colleges and Secondary Schools.

April 12, 1915—Governor George A. Carlson signed bill of Hon. Scott Humason and Senator Pearson, giving the school .03 mill permanent income.

March 24, 1917—Governor Julius C. Gunter signed bill for additional mill levy of .02 mill for maintenance and .015 mill for ten years for buildings. Hon. T. J. Thompson and Senator Hetherington were instrumental in securing passage of bill.

May 1, 1919—Grant Ruland assumed duties as acting president, following resignation of James Herbert Kelley.

June 5, 1919—Samuel Quigley was elected president to assume duties as such August 1, 1919.

January 17, 1920—By order of the State Board of Trustees, the course of study was extended to four years, beginning with the summer quarter, 1920. The degree of Bachelor of Arts is granted to successful students.

May 23, 1920—Cornerstone laid for Auditorium-Gymnasium building.

February 25, 1921—Admitted to Class A standing in the American Association of Teachers' Colleges.

March 23, 1921—Governor Oliver H. Shoup signed the bill of

Hon. Charles A. Cowan giving .03035 of a mill additional annual income for the maintenance of the school.

December 28, 1921—By order of the State Board of Trustees, the course of study was extended to five years. The Master of Arts Degree and Life Certificate is granted to students who successfully complete one year of approved graduate work and a thesis based upon a research problem.

March 30, 1923—Governor William E. Sweet signed the bill of Hon. Charles A. Cowan changing the name by which the school shall be known to the public as the Western State College of Colorado.

January 17, 1925—Buell Crawford Gymnasium dedicated.

June, 1925—College Club House completed.

March 26, 1927—Governor William H. Adams signed the bill of Senator James E. Moore and Hon. Charles A. Cowan giving .0200,875 additional annual income for the maintenance of the college.

The Western State College is supported by a tax of .10,028,875 of a mill on the assessed valuation of the taxable property of the State. The Twenty-first General Assembly gave the school one-twentieth of three-tenths of a mill tax levy for ten years as a building fund. During the ten-year period, therefore, the college is assured of a building fund of about \$235,000.00.

In addition the town of Gunnison and the county of Gunnison each contribute substantially to the budget.

Valuation of Buildings and Permanent Equipment

North Hall	\$100,000.00
Central Hall	148,000.00
Colorado Hall	55,000.00
Buell Crawford Gymnasium	50,000.00
South Hall (H. S. Training School Building).....	158,000.00
Pine Street School (Elementary Training School).....	110,000.00
College Club House (built by students, friends, and alumni)	7,000.00
Central Heating Plant	38,000.00
Highland Village (Cottages)	16,000.00
Permanent Equipment (all buildings)	60,000.00
Grandstands (contributed by the Gunnison County Stockmen)	5,000.00
Campus (45 acres within city limits, water rights, etc.)	30,000.00
Students' Loan Funds (contributed largely by citizens of Gunnison; helps about 100 students annually) ..	7,000.00
Total valuation May 1, 1927.....	\$784,000.00

THE ADAMS STATE NORMAL SCHOOL

A Teachers' College Offering Two-Year and Four-Year Programs

The Adams State Normal School of Colorado was authorized by the Legislature of 1921. Appropriation for the building was made by the Legislature of 1923, and construction placed in charge of a board of building trustees. The property was placed under the control and management of the Board of Trustees of Normal Schools in the fall of 1924. The Legislature of 1925 made the first appropriation for maintenance and gave authority to issue stan-

dard college degrees, thus establishing the four-year program of a teachers' college. The school opened its work with the summer quarter of 1925. The Legislature of 1927 provided a millage tax (.05 of 1 mill) on all the property of the State for general support and maintenance. This assures the school a certain permanent financial basis so far as general maintenance is concerned. It is one of the three State schools of collegiate rank provided by the State of Colorado, whose major function is to train individuals for teaching in its public schools.

Alamosa, the home of the State Normal School, is situated in the heart of the San Luis Valley of Southern Colorado, on the Rio Grande del Norte. It is a city of some five thousand inhabitants and has an elevation of 7,500 feet. The mountain ranges surrounding the valley form an attractive setting as they rise from six to seven thousand feet above the floor of the valley. They vary from twenty-five to seventy-five miles in distance from Alamosa. The healthful, invigorating atmosphere is conducive to effective study.

The basic general support of the Normal School is a millage tax on the property of the State. At present the rate is five-hundredths of one mill. Supplementing this income there are student fees, miscellaneous income and special appropriations from the State Legislature for special purposes.

STATE INDUSTRIAL SCHOOL FOR GIRLS

The only Colorado State institution for delinquent girls. It is supported by county and State funds. The girls are committed by the county judges of the State.

Located about twelve miles southwest of Denver. Postoffice address, Mt. Morrison, Colorado, R. R. No. 1. Express, telephone and telegraph address, Denver, Colorado.

Farm of 50 acres; 17 acres in alfalfa, 8 acres in garden, 10 acres in orchard, remaining in buildings and grounds.

Eight brick buildings, several frame buildings, cottage plan for housing girls. Six cottages accommodating 155 girls (capacity 165).

Buildings

Administration Building—Office and living quarters for executive officers; thirteen rooms.

Chapel Building—Assembly hall with stage and motion picture machine room; three class rooms.

Clara Barton Cottage and Hospital—Receiving cottage and hospital in one building; capacity, twenty girls; ten single rooms, five dormitory beds, two officers' rooms, hospital, ten ward beds, two isolation rooms, operating room, diet kitchen, nurse's room.

Elizabeth Purell Cottage—Two floors; capacity, thirty girls; thirty single rooms, four officers' rooms; gymnasium in basement.

Marion Rudgers Cottage—Same as Purell Cottage; no gymnasium.

Frances Willard Cottage—Three floors; capacity, thirty girls; nineteen single rooms, one double room, nine dormitory beds, four officers' rooms, sewing class in basement.

Romona Cottage—Three floors; capacity, thirty girls; sixteen

single rooms, fourteen beds in dormitory, four officers' rooms; one school room on first floor; cooking class in basement.

Louisa M. Aleott Cottage—Three floors; capacity, twenty-five girls; all dormitory beds; sewing class room in an addition.

Farm house of five rooms for assistant farmer, barn, sheds, pump house and water tanks, ice house, garage for two cars, work shop, root cellar.

Employees

Superintendent	5 Head Matrons
Assistant Superintendent	4 Dietitians
Parole Officer	2 Assistant Matrons and Teachers
Office Secretary	3 Academic Teachers
Farm Supervisor	2 Domestic Science Teachers
Assistant Farmer	1 Music Teacher
Nurse	1 Outdoor Matron
Supply Matron	
Visiting Physician	Visiting Dentist
Visiting Oculist	Colorado Springs Parole Officer

INDUSTRIAL SCHOOL FOR BOYS IS NOT A PENAL INSTITUTION

The Industrial School is not a place of punishment, nor is it in any sense a prison—no more so than our public schools upon which the law requires an enforced attendance. It is a place of education, reformation, refinement and culture. It is a beneficent provision for the uplift of boys, who, by reasons of their surroundings and conditions, are deprived of an education and moral training, so essential to their well-being and good citizenship.

The Board of Control has adopted the above definition for the guidance in administration of the school.

The location of the school is at Golden, Colorado.

THE STATE HOME FOR CHILDREN

This is the only state institution for the care of the dependent, neglected, and maltreated children of Colorado.

It is supported by state appropriations.

No church collections are solicited.

No county or individual contributions are received.

The children are all committed by the Juvenile or County Courts of the various counties of the state.

The county pays the court costs and the expense of transportation for the children to the Home.

There are desirable children now in the Home, to be placed in good families upon adoption or special contract.

The court and other expenses for adoption or indenture papers are paid by the individuals securing the same.

The State Agent receives no commission on children received, or on those placed in private homes.

The members of the Board of Control serve without compensation.

“The said Board is hereby made the legal guardian of the persons and estates of all children admitted to

said Home, pursuant to law, which guardianship shall continue during the minority of such children, except in cases where, under this act, the guardianship may be cancelled by resolution adopted by said Board." (From Section 5 of Chapter 26, Session Laws, 1895.)

For placing a child no remuneration is required or received of the counties or individuals who are charitably disposed.

Parents are not encouraged to part with their children.

According to Chapter 26, Session Laws of 1895, all children free from chronic or contagious disease, who are dependent upon the public for support, and those who are neglected, maltreated, or in evil environment, are eligible as inmates of the State Home.

Location, 2305 South Washington street, Denver, Colorado.

COLORADO SCHOOL FOR DEAF AND BLIND

The Colorado Institute for Deaf Mutes was founded in 1874, while the state was yet a territory, the blind department being added in 1883. There were present on the opening day six pupils, the home of the school being a small frame building long since torn down. Up to the present time some 828 deaf persons and 370 blind have been enrolled as pupils, the number of both in attendance the present session (1925-1926) being 229. The buildings now number nineteen, not including buildings at the ranch, with a total valuation, including equipment, of \$876,209.80.

The Colorado School for Deaf and Blind is, as the name implies, a school pure and simple. It was established in accordance with the purpose of the state to give to every child within her boundary capable of taking it, a common school education. It is not in any sense an "asylum" or "home" for the afflicted, it is not a hospital for the care and treatment of the eyes and ears, and it is not a place for the detention and care of the imbecile. A child so unsound physically as to require constant care, or so backward mentally as to make no progress in the literary department, cannot be retained in the school.

The course of study for the deaf covers about the same ground as the public schools of the state. The blind, to whom language presents no difficulty, are given a very thorough high school course. To secure the best results in both instances it is necessary that the child be entered as soon as it becomes of school age, and that the attendance be regular and continuous throughout the entire course.

Location, Colorado Springs, Colorado.
